Board of Directors Report

**Board of Directors Report
For the Year Ended December 31, 2021**

Dear Shareholders,

On behalf of the Board of Directors and myself, it gives me great pleasure to welcome you to the Annual General Meeting to present the financial report for the year 2021, along with the financial statements, as well as the Auditor's report for the year ended, 31, December 2021.

During 2021, global economies continued to witness challenging times, the most recent the global pandemic (COVID-19) with continued increased cases and more outbreaks of variants to further stress financial markets and the insurance industry. However, the UAE leadership continued its vigorous efforts to safeguard public health by enforcing concrete measures to mitigate the risks on public health. As a result, the United Arab Emirates has reached a staggering 100% vaccination by the end of 2021. Moving forward, we believe conditions will continue to improve. As the world continues to learn more about Covid 19 and the subsequent variant, worldwide vaccination efforts remain steadfast, and education about safety measures continue to evolve, causing world citizens to return to normality.

The UAE leadership continues to formulate and apply stronger regulations to deliver better performance for the insurance industry. Despite the challenges of an overcrowded industry, fierce competition, and the challenges of low-interest rates on investments, Alliance continued to show solid results and consistent profitability for the last eleven years. Alliance also maintained its (A- Excellent) rating by A.M. Best for fifteen consecutive years, and these results are due to robust strategies implemented with careful analysis of market conditions. The approach by Board Members, Senior Management, and employees are the main reason behind the continued profitable position throughout the years.

The following is the overall performance summary of the company for the year 2021 compared with the year 2020:

Please note all figures are in AED

	2021	2020
Cash and cash equivalents/deposits/statutory deposits	509,694,147	557,163,263
Investments at amortised cost	333,077,974	335,622,610
Total Assets	1,374,202,082	1,446,261,734
Total equity	538,617,097	526,898,606
Gross premiums	304,047,160	323,267,756
Gross claims paid	73,144,362	41,116,877
Profit for the year	41,121,212	42,140,206

The net profit for the year 2021 after technical reserves and doubtful debts stands at AED 41,121,212 Compared to AED 42,140,206 in 2020.

In light of the results for the financial year ended 31 December 2021, the Board of Directors presents for your consideration the following recommendations:

1. Approval of the Directors' report and the Auditor's report for the year 2021.
2. Approval of the financial statements for the year ended 31 December 2021.
3. Approve the recommendation of the Board for the distribution of profits for the year 2021 and the retained earnings of the year 2020 amounting AED 51,229,385 as follows:
 - a. AED 4,112,121 to be transferred to the Statutory Reserve as 10% of the net profit for the year 2021.
 - b. AED 4,112,121 to be transferred to the Regular Reserve as 10% of the net profit for the year 2021.
 - c. AED 900,805 to be transferred to the Reinsurance Reserve as 0.5% of the total reinsurance premiums ceded for the year 2021.
 - d. AED 30,000,000 (30% of paid-up capital) as cash dividend to shareholders.
 - e. AED 1,115,883 Director's Remuneration.
 - f. AED 10,988,455 Retained Earnings carried forward to the fiscal year 2022.
4. To discharge the Chairman, Board of Directors and Auditors from their responsibility for the year ended 31 December 2021.
5. To appoint / reappoint Auditors for the year 2022 and determine their fees.

To the best of our knowledge, the financial information included in the report fairly presents in all material respects the financial condition, financial performance and cash flows of the Company as of, and for, the periods presented therein.

In conclusion, the Board of Directors would like to take this opportunity to extend their sincere appreciation and gratitude to His Highness Sheikh Khalifa Bin Zayed Bin Sultan Al Nahyan, the President of the United Arab Emirates, His Highness Sheikh Mohamed Bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, and their Highnesses, the brothers' Sheikhs, members of the Supreme Council of the Union for their continuous support to economic institutions and national companies.

We also take this opportunity to express our appreciation to our reinsurance partners who continue to support us. We also express our sincere appreciation to our clients for their trust in our company, and to the management and staff of Alliance for their dedication, hard work and loyalty.

INDEPENDENT AUDITOR'S REPORT

**The Shareholders of
Alliance Insurance P.S.C.
Dubai
United Arab Emirates**

Report on the audit of the financial statements

Opinion

We have audited the financial statements of **Alliance Insurance P.S.C. (the "Company")**, which comprise the statement of financial position as at 31 December 2021, and the statement of profit or loss, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2021, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards ('IFRSs').

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the other ethical requirements that are relevant to our audit of Company's financial statements in United Arab Emirates, and we have fulfilled our other ethical responsibilities. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

**INDEPENDENT AUDITOR'S REPORT
TO THE SHAREHOLDERS OF ALLIANCE INSURANCE P.S.C. (continued)**

Key audit matters (continued)

Key audit matter	How our audit addressed the key audit matter
<p><i>Valuation of insurance contract liabilities and reinsurance contract assets</i></p> <p>As at 31 December 2021, insurance contract liabilities and reinsurance contract assets amounted to AED 663.1 million and AED 160.4 million respectively, as detailed in Note 10 to these financial statements.</p> <p>The valuation of these liabilities requires significant judgements to be applied and estimates to be made. Reinsurance contract assets includes amounts that the Company is entitled to receive in accordance with the reinsurance contracts and, more specifically, the share of the reinsurer in the insurance contract liabilities of the Company.</p> <p>This is particularly the case for those liabilities that are based on the best-estimate of technical reserves that includes ultimate cost of all claims incurred but not settled at a given date, whether reported or not, together with the related claims handling costs and related technical reserves along with their reinsurance recoveries. A range of models are applied by management, the internal actuary and independent external actuary to determine these provisions. Underlying these models are a number of explicit or implicit assumptions relating to the expected settlement amount and settlement patterns of claims. Changes in these assumptions can result in material impacts to the valuation of these liabilities.</p> <p>As a result of all the above factors, we consider the valuation of insurance contract liabilities and reinsurance contract assets as key audit matter.</p>	<p>Our audit procedures included:</p> <ul style="list-style-type: none"> • Assessing the design and implementation of key controls related to the integrity of the data used in the actuarial reserving process; • Evaluating and testing the claims handling and case reserve setting processes of the Company including allocation of the reinsurance portion of claims; • Evaluating and testing the data used in the actuarial reserving process; • Testing samples of claims case reserves by comparing the estimated amount of the case reserve to appropriate documentation, such as reports from loss adjusters, confirmations obtained from lawyers, reinsurance contracts etc.; • Reperforming reconciliations between the claims data recorded in the Company's systems and the data used in the actuarial reserving calculations; • Evaluating the objectivity, skills, qualifications and competence of the independent external actuary; • Reviewing the engagement letter with the independent external actuary to determine if the scope was sufficient for audit purposes; and • Agreeing samples of unearned premiums to appropriate documentation. <p>In addition, with the assistance of our internal actuarial specialists, we:</p> <ul style="list-style-type: none"> • performed necessary reviews to ascertain whether the results are appropriate for valuation of insurance contract liabilities and reinsurance contract assets; • reviewed the actuarial report compiled by the independent external actuary of the Company and calculations underlying these provisions, particularly the following areas: <ul style="list-style-type: none"> • Appropriateness of the calculation methods and the model used (actuarial best practice) • Review of key assumptions • Consistency of assumptions used between valuation periods • General application of financial and mathematical rules. <p>We assessed the disclosures in the financial statements about insurance contract liabilities and reinsurance contract assets to determine if they were in compliance with IFRSs.</p>

**INDEPENDENT AUDITOR'S REPORT
TO THE SHAREHOLDERS OF ALLIANCE INSURANCE P.S.C. (continued)**

Key audit matters (continued)

Key audit matter	How our audit addressed the key audit matter
<p><i>Valuation of investment properties</i></p> <p>Investment properties represented 15.1% of total assets as at 31 December 2021. Management appointed independent external valuers to determine the fair valuation of investment properties.</p> <p>The valuation of investment properties, as detailed in Note 7, requires significant judgement to be applied and estimates to be made by both management and the independent external valuers. Consequently, we considered this to be a key audit matter.</p>	<p>Our audit procedures included:</p> <ul style="list-style-type: none"> • We obtained an understanding of the process of determining the fair value of the investment properties; • We assessed the controls over the determination of the fair value of investment property to determine if they had been appropriately designed and implemented; • We assessed the competence, skills, qualifications and objectivity of the independent external valuers; • We reviewed the scope of the engagement between the external valuer and the Company to determine if this was sufficient for audit purposes; • We verified the accuracy, completeness and relevance of the input data used for deriving fair values; • We utilised our internal valuation experts on a sample basis to evaluate the methodology used and the appropriateness of key assumptions used in the investment property valuations; • We reperformed the mathematical accuracy of the valuations on a sample basis; • We agreed the results of the valuations to the amounts recorded in the financial statements; and • We assessed the adequacy of disclosures included in financial statements against the requirements of IFRSs.

Other Information

The Board of Directors and management is responsible for the other information, which comprises the Directors' Report which we obtained prior to the date of this auditor's report. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

**INDEPENDENT AUDITOR'S REPORT
TO THE SHAREHOLDERS OF ALLIANCE INSURANCE P.S.C. (continued)**

Other Information (continued)

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with IFRSs and their preparation in compliance with the applicable provisions of the articles of association of the Company, United Arab Emirates (U.A.E.) Federal Law No. (2) of 2015 (as amended), and U.A.E. Federal Law No. 6 of 2007, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

**INDEPENDENT AUDITOR'S REPORT
TO THE SHAREHOLDERS OF ALLIANCE INSURANCE P.S.C. (continued)**

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

- Conclude on the appropriateness of management use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosure are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law and regulations preclude public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other Legal and Regulatory Requirements

Further, as required by the UAE Federal Law No. (2) of 2015 (as amended), we report that for the year ended 31 December 2021:

- i) we have obtained all the information we considered necessary for the purposes of our audit;
- ii) the financial statements have been prepared and comply, in all material respects, with the applicable UAE Federal Law No. (2) of 2015 (as amended);
- iii) the Company has maintained proper books of account;
- iv) the financial information included in the Directors' report is consistent with the books of account of the Company;
- v) as disclosed in Note 8 to the financial statements, the Company has investment in securities as at 31 December 2021;

**INDEPENDENT AUDITOR'S REPORT
TO THE SHAREHOLDERS OF ALLIANCE INSURANCE P.S.C. (continued)**

Report on other Legal and Regulatory Requirements (continued)

- vi) Note 28 to the financial statements discloses material related party transactions and balances, and the terms under which they were conducted;
- vii) based on the information that has been made available to us nothing has come to our attention which causes us to believe that the Company has contravened during the financial year ended 31 December 2021 any of the applicable provisions of the UAE Federal Law No. (2) of 2015 (as amended), or its Articles of Association, which would materially affect its activities or its financial position as at 31 December 2021; and
- viii) Note 26 to the financial statements discloses the social contributions made during the financial year ended 31 December 2021.

Further, as required by the U.A.E. Federal Law No. 6 of 2007, and the related Financial Regulations for Insurance Companies issued by the Central Bank of the United Arab Emirates ("CBUAE"), we report that we have obtained all the information and explanations we considered necessary for the purpose of our audit.

Notes to the financial statements
For the year ended 31 December 2021

1. Segment information

For management purposes, the Company is organised into two business segments, property and liability insurance (general insurance) and insurance of persons and fund accumulation operations (life assurance). The general insurance segment comprises motor, marine, fire, engineering, medical, and general accident. The life assurance segment includes only long term life and group life. These segments are the basis on which the Company reports its primary segment information. Segment-wise information is disclosed below:

1.1 Segment financial position for insurance of persons and fund accumulation operations

2. General information

Alliance Insurance P.S.C. (the “Company”) is a Public Shareholding Company which was originally established in Dubai on 1 July 1975 as a limited liability company under the name of Credit and Commerce Insurance Company. The Company was subsequently incorporated in Dubai on 6 January 1982 as a limited liability company under an Emiri Decree. The Company was converted to a Public Shareholding Company (P.S.C.) in January 1995, in accordance with the UAE Federal Commercial Companies Law No. (8) of 1984 (as amended). The Company’s shares are listed on the Dubai Financial Market.

The licensed activities of the Company are issuing short term and long-term insurance contracts. The insurance contracts are issued in connection with property, motor, aviation and marine risks (collectively known as general insurance) and individual life (participating and non-participating), group life, personal accident, medical and investment linked products.

The registered address of the Company is Warba Centre, P.O. Box 5501, Dubai, United Arab Emirates.

Federal Law No. 32 of 2021 on Commercial Companies (the “New Companies Law”) was issued on 20 September 2021 and will come into effect on 2 January 2022, to entirely replace Federal Law No. 2 of 2015 on Commercial Companies, as amended (the “2015 Law”). The Company is in the process of reviewing the new provisions and will apply the requirements thereof no later than one year from the date on which the amendments came into effect.

Federal Decree Law No. (24) of 2020 which amends certain provisions of the U.A.E Federal Law No. 6 of 2007 on Establishment of Insurance Authority and Organisation of its Operations, as amended, was issued on 27 September 2020 and the amendments came into effect on 2 January 2021. Effective 2 January 2021, the Insurance Sector became under the supervision and authority of the Central Bank of the United Arab Emirates (“CBUAE”).

3. Application of new and revised International Financial Reporting Standards (“IFRSs”)

3.1 New and revised IFRSs applied by the Company

The following new and revised IFRSs, which became effective for annual periods beginning on or after 1 January 2021, have been adopted in these financial statements. The application of these revised IFRSs has not had any material impact on the amounts reported for the current and prior years but may affect the accounting for future transactions or arrangements.

- *Interest Rate Benchmark Reform—Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16*— In the current year, the Company adopted the Phase 2 amendments Interest Rate Benchmark Reform—Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16. Adopting these amendments enables the Company to reflect the effects of transitioning from interbank offered rates (IBOR) to alternative benchmark interest rates (also referred to as ‘risk free rates’ or RFRs) without giving rise to accounting impacts that would not provide useful information to users of financial statements. The Company has not restated the prior period. Instead, the amendments have been applied retrospectively with any adjustments recognised in the appropriate components of equity as at 1 January 2021.
- *COVID-19-Related Rent Concessions (Amendment to IFRS 16)* — In the current financial year, the Company has applied the amendment to IFRS 16 (as issued by the Board in May 2021) in advance of its effective date.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

3. Application of new and revised International Financial Reporting Standards (“IFRSs”)
(continued)

3.2 New and revised IFRS standards and interpretations but not yet effective

The Company has not applied the following new and revised IFRSs that have been issued but are not yet effective.

- IFRS 17 ‘*Insurance Contracts*’ establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes IFRS 4 Insurance Contracts.

IFRS 17 is effective for annual reporting periods beginning on or after 1 January 2023, with comparative figures required. Early application is permitted, provided that the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17. Retrospective application is required.
- Amendments to IFRS 10 ‘*Consolidated Financial Statements*’ and IAS 28 ‘*Investments in Associates and Joint Ventures*’ (2011) deals with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. (effective date deferred indefinitely, early adoption permitted).
- IAS 1 ‘*Presentation of Financial Statements*’ – Amendments on Classifications. Effective for annual period beginning on or after 1 January 2023.
- Amendments relating IAS 16, IAS 37, IFRS 3 and some annual improvements on IFRS 1, IFRS 9, IAS 41 and IFRS 16 (effective for annual periods beginning on or after 1 January 2022).
- IFRS 4 relating to amendments regarding the expiry date of the deferral approach. The fixed expiry date for the temporary exemption in IFRS 4 from applying IFRS 9 is now 1 January 2023.
- Amendments to IFRS 9 that clarifies that for the purpose of performing the ‘10 per cent test’ for derecognition of financial liabilities in determining those fees paid net of fees received, a borrower includes only fees paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other’s behalf. The amendments are effective for annual periods beginning on or after 1 January 2022, with earlier application permitted.
- Amendments regarding Disclosure of Accounting policies (IAS 1 and IFRS practice statement 2), amendments to IAS 8 ‘*Accounting Policies, Changes in Accounting Estimates and Errors*’—Definition of Accounting Estimates and Amendments to IAS 12 ‘*Income Taxes*’—Deferred Tax related to Assets and Liabilities arising from a Single Transaction (effective for annual periods beginning on or after 1 January 2023).

Management anticipates that these new standards, interpretations and amendments will be adopted in the Company’s financial statements as and when they are applicable and adoption of these new standards, interpretations and amendments, except for IFRS 17, mentioned below, may have no material impact on the financial statements of the Company in the period of initial application.

Management anticipates that IFRS 17 will be adopted in the Company’s financial statements for the annual period beginning 1 January 2023. The application of IFRS 17 may have significant impact on amounts reported and disclosures made in the Company’s financial statements in respect of its insurance contracts. However, it is not practicable to provide a reasonable estimate of the effects of the application of this standard until the Company performs a detailed review.

Management expects that majority of the short-term contracts issued by the Company will be eligible for the premium allocation approach, while for individual life contracts both the general measurement approach and the variable fee approach will be used as applicable.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies

The summary of significant accounting policies applied in the preparation of these financial statements are summarised below. These policies have been consistently applied to each of the years presented.

4.1 Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and comply with applicable requirements of the Federal Law No. (6) of 2007 Concerning the Establishment of the Insurance Authority & Organisation of the Insurance Operations, the Federal Law No. (2) of 2015 Concerning the Commercial Companies (as amended), Insurance Authority Board Decision No. (25) of 2014 Pertinent to Financial Regulations for Insurance Companies and Insurance Authority' Board of Directors Decision No. (23) of 2019 Concerning Instructions Organizing Reinsurance Operations.

4.2 Basis of preparation

The financial statements have been prepared on the historical cost basis except for revaluation of certain financial instruments and investment properties as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such basis, except for share-based payment transactions that are within the scope of IFRS 2, leasing transactions that are within the scope of IAS 17, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in IAS 2 or value in use in IAS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1,2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the assets or liability.

The Company presents its statement of financial position broadly in order of liquidity, with a distinction based on expectations regarding recovery or settlement within twelve months after the reporting date (current) and more than twelve months after the reporting date (non-current), presented in the notes.

The principal accounting policies are set out below.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.3 Insurance contracts

4.3.1 Classification

The Company issues contracts that transfer either insurance risk or both insurance and financial risks.

Contracts under which the Company accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder are classified as insurance contracts. Insurance risk is significant if an insured event could cause the Company to pay significant additional benefits due to happening of the insured event compared to its non-happening.

Insurance contracts may also transfer some financial risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, security price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract.

Contracts where insurance risk is not significant are classified as investment contracts. Once a contract is classified as an insurance contract it remains classified as an insurance contract until all rights and obligations are extinguished or expired.

4.3.2 Recognition and measurement

Insurance contracts are classified into two main categories, depending on the nature of the risk, duration of the risk and whether or not the terms and conditions are fixed. These contracts are general insurance contracts and life assurance contracts.

General insurance contracts

Gross premiums written reflect business incepted during the year, and exclude any fees and other amounts collected with and calculated based on premiums. These are recognised when underwriting process is complete and policies are issued. Premiums are recognized as revenue (earned premiums) proportionately over the period of coverage.

The earned portion of premium is recognised as an income and are shown in the profit or loss before deduction of commission. Premiums are earned from the date of attachment of risk over the indemnity period and unearned premium is calculated using the basis described below:

Life assurance contracts

In respect of the short term life assurance contracts, premiums are recognised as revenue (earned premiums) proportionately over the period of coverage. The portion of the premium received in respect of in-force contracts that relates to unexpired risks at the end of the reporting period is reported as the unearned premium liability. Premiums are shown before the deduction of the commission.

In respect of long term life assurance contracts, premium are recognised as revenue (earned premiums) when they become payable by the contract holder. Premiums are shown before deduction of commission.

Premiums for life policies are recognised when it is paid by the contract holder.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.3 Insurance contracts (continued)

4.3.2 Recognition and measurement (continued)

Life assurance contracts (continued)

A liability for contractual benefits that are expected to be incurred in future is recorded when the premiums are recognised. The liability is based on the assumptions as to mortality, persistency, maintenance expenses and investment income that are established at the time the contract is issued. A margin for adverse deviation is included in the assumptions.

Where a life assurance contract has a single premium or limited number of premium payments due over a significantly shorter period than the period during which the benefits are provided, the excess of the premiums payable over the valuation premiums is deferred and recognised as income in line with the decrease of unexpired insurance risk of the contract in-force or for annuities in force, in line with the decrease of the amount of future benefits expected to be paid.

The liabilities are recalculated at the end of each reporting period using the assumptions established at the inception of the contract.

Claims and benefits payable to contract holders are recorded as expenses when they are incurred.

Unearned premium reserve

The unearned premium considered in the insurance contract liabilities comprise the estimated proportion of the gross premiums written which relates to the periods of insurance subsequent to the statement of financial position date. UPR is calculated using the 1/365 method except for marine cargo and general accident.

The UPR for marine cargo is recognised as fixed proportion of the written premiums as required in the financial regulation issued under UAE Federal Law No. 6 of 2007, and UPR for general accident assumes a linear increase in risk with the duration of the project such that the risk faced is 100% at the expiry of the contract, the rate at which the premium is earned is deemed to increase at the same rate at which the risk faced increases over the lifetime of the policy. Unearned premiums for individual life business are considered by the Company's actuary in the calculation for life reserve fund.

Claims

Claims incurred comprise the settlement and the internal and external handling costs paid and changes in the provisions for outstanding claims arising from events occurring during the financial period. Where applicable, deductions are made for salvage and their recoveries.

Claims outstanding comprise provisions for the Company's estimate of the ultimate cost of settling all claims incurred but unpaid at the reporting date whether reported or not, and related internal and external claims handling expense reduced by expected salvage and other recoveries. Claims outstanding are assessed by reviewing individual reported claims. Provisions for claims outstanding are not discounted. Adjustments to claims provisions established in prior periods are reflected in the financial statements of the period in which the adjustments are made. The methods used, and the estimates made, are reviewed regularly. Provision is also made for any claims incurred but not reported ("IBNR") at the date of statement of financial position based on actuarial estimate obtained from an independent actuary using a range of standard actuarial claim projection techniques, based on empirical data and current assumptions that may include a margin for adverse deviation as required by the regulations.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.3 Insurance contracts (continued)

4.3.2 Recognition and measurement (continued)

Unallocated loss adjustment expense reserve

A provision for unallocated loss adjustment expenses (ULAE), which cannot be allocated to specific claims, is made at the reporting date based on actuarial estimates obtained from an independent actuary.

Unexpired risk reserve/liability adequacy test

Provision is made for unexpired risk arising from general insurance contracts where the expected value of claims and expenses attributable to the unexpired periods of policies in force at the reporting date exceeds the unearned premiums provision and already recorded claim liabilities in relation to such policies. The provision for premium deficiency is calculated by reference to classes of business which are managed together, after taking into account the future investment return on investments held to back the unearned premiums and claims provisions.

Reinsurance

Contracts entered into by the Company with reinsurers under which the Group is compensated for losses on one or more contracts issued by the Company and that meet the classification requirements for insurance contracts are recognised as reinsurance contracts. Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the Company under which the contract holder is another insurer, are included in insurance contracts. The benefits to which the Company is entitled under its reinsurance contracts are recognised as reinsurance contract assets.

The Company cedes reinsurance in the normal course of business for the purpose of limiting its net loss potential through the diversification of its risks. Assets, liabilities and income and expense arising from ceded reinsurance contracts are presented separately from the assets, liabilities, income and expense from the related insurance contracts because the reinsurance arrangements do not relieve the Company from its direct obligations to its policyholders.

Amounts due to and from reinsurers are accounted for in a manner consistent with the related insurance policies and in accordance with the relevant reinsurance contracts. Reinsurance premiums are deferred and expensed using the same basis as used to calculate unearned premium reserves for related insurance policies. The deferred portion of ceded reinsurance premiums is included in reinsurance assets.

Reinsurance assets are assessed for impairment on a regular basis. A reinsurance asset is deemed impaired if there is objective evidence, as a result of an event that occurred after its initial recognition, that the Company may not recover all amounts due, and that event has a reliably measurable impact on the amounts that the Company will receive from the reinsurer. Impairment losses on reinsurance assets are recognised in statement of profit or loss in the year in which they are incurred.

Profit commission in respect of reinsurance contracts is recognised on an accrual basis. Reinsurance assets or liabilities are derecognized when the contractual obligations/rights are extinguished or expire or when the contract is transferred to another party.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.3 Insurance contracts (continued)

4.3.2 Recognition and measurement (continued)

Deferred acquisition cost

For general insurance contracts, the deferred acquisition cost asset represents the position of acquisition costs which corresponds to the proportion of gross premiums written that is unearned at the reporting date. Commission income related to underwriting activities are recognised on a time proportion basis over the effective period of policy using the same basis as described for unearned premium reserve.

Commissions and other acquisition costs that vary with and are related to securing new contracts and renewing existing contracts are capitalised as an intangible asset (DAC). All other costs are recognised as expenses when incurred.

Insurance receivables and payables

Amounts due from and to policyholders, agents and reinsurers are financial instruments and are included in insurance receivables and payables, and not in insurance contract liabilities or reinsurance assets.

Mathematical reserve

This reserve is determined by the independent actuarial valuation of future policy benefits. Actuarial assumptions include a margin for adverse deviation and generally vary by type of policy, year of issue and policy duration. Mortality and withdrawal rate assumptions are based on experience. Adjustments to the balance of this reserve are affected by charges or credits to income. Certain generated returns are accrued and provided for in this reserve.

Unit linked liabilities

For unit linked policies, liability is equal to the policy account values. The account value is the number of units times the bid price.

Insurance contract liabilities and reinsurance assets

Insurance contract liabilities towards outstanding claims are made for all claims intimated to the Company and still unpaid at the statement of financial position date, in addition for claims incurred but not reported and Life assurance fund. Outstanding claims provisions are based on the estimated ultimate cost of all claims incurred but not settled at the end of the reporting period after reduction for the expected value of salvage and other recoveries. Delays can be experienced in the notification and settlement of certain types of claims, therefore the ultimate cost of claims cannot be known with certainty at the end of the reporting period. The liability is not discounted for the time value of money. No provision for equalisation or catastrophic reserves is recognised. The liability is derecognised when it is expired, discharged or cancelled.

The reinsurers' portion towards the above outstanding claims, claims incurred but not reported and unearned premium is classified as reinsurance contract assets in the financial statements.

Salvage and subrogation reimbursements

Estimates of salvage and subrogation reimbursements are considered as an allowance in the measurement of the insurance liability for claims.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.4 Revenue (other than insurance revenue)

Revenue (other than insurance revenue) comprises the following:

Fee and commission income

Fee and commissions received or receivable which do not require the Company to render further service are recognised as revenue by the Company on the effective commencement or renewal dates of the related policies.

Dividend income

Dividend income is recognised when the Company's right to receive the payment has been established.

Interest income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Rental income

Rental income from investment properties which are leased under operating leases are recognised on a straight-line basis over the term of the relevant lease.

4.5 General and administrative expenses

Direct expenses are charged to the respective departmental revenue accounts. Indirect expenses are allocated to departmental revenue accounts on the basis of gross premiums. Other administration expenses are charged to profit or loss as unallocated general and administrative expenses.

4.6 Leasing

The Company as lessee

For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed as the leases are for short term (defined as leases with a lease term of 12 months or less).

4.7 Foreign currencies

The financial statements of the Company are presented in the currency of the primary economic environment in which the Company operates (its functional currency). For the purpose of the financial statements, the results and financial position of the Company are expressed in Arab Emirates Dirhams ("AED"), which is the functional currency of the Company and the presentation currency for the financial statements.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.7 Foreign currencies (continued)

In preparing the financial statements of the Company, transactions in currencies other than the Company's functional currency (foreign currencies) are recorded at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognised in profit or loss in the year in which they arise.

4.8 Employee benefits

Annual leave and leave passage

An accrual is made for the estimated liability for employees' entitlement to annual leave and leave passage as a result of services rendered by eligible employees up to the end of the year.

Provision for employees' end of service indemnity

Provision is made for the full amount of end of service benefits due to non-UAE national employees in accordance with the U.A.E Labour Law and is based on current remuneration and their period of service at the end of the reporting period.

Defined contribution plan

UAE national employees of the Company are members of the Government-managed retirement pension and social security benefit scheme pursuant to UAE Labour Law No. 7 of 1999. The Company is required to contribute 12.5% of the "contribution calculation salary" of payroll costs to the retirement benefit scheme to fund the benefits. The employees and the Government contribute 5% and 2.5% of the "contribution calculation salary" respectively, to the scheme. The only obligation of the Company with respect to the retirement pension and social security scheme is to make the specified contributions. The contributions are charged to income statement.

4.9 Property and equipment

Land is not depreciated and is stated at cost.

Capital work in progress is stated at cost, less any identified impairment loss. Depreciation of these assets, on the same basis as other property and equipment, commences when the assets are ready for their intended use.

Other property and equipment are stated at cost less accumulated depreciation and any identified impairment losses.

Depreciation is charged so as to write off the cost of assets, other than capital work in progress and land, over their estimated useful lives, using the straight line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.9 Property and equipment (continued)

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the income statement.

The useful lives considered in the calculation of depreciation for the assets are 4 years except for building which has a useful life of 10 years.

4.10 Investment properties

Investment properties are properties are held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, used in providing services or for administrative purposes. Investment properties are measured at cost on initial recognition and subsequently at fair value with any change therein recognized in the statement of profit or loss.

The Company determines fair value on the basis of valuations provided by two independent valuers who hold a recognised and relevant professional qualification and have recent experience in the location and category of the investment properties being valued.

Investment properties is derecognised when either they have been disposed of or when the investment properties is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment properties are recognised in the profit or loss in the period of retirement or disposal.

Transfers are made to/or from investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property and equipment up to the date of change in use.

4.11 Impairment of tangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.11 Impairment of tangible assets (continued)

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

4.12 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

4.13 Premium and insurance balances receivable

Premium and insurance balances receivable are measured at initial recognition at fair value and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in the profit or loss during that period when there is objective evidence of that the asset is impaired. Premium and insurance balances receivable are derecognised when the derecognition criteria for financial assets have been met.

4.14 Insurance liabilities

Insurance liabilities are recognized when due and measured on initial recognition at the fair value of the consideration received less directly attributable transaction costs. Subsequently, insurance liabilities are measured at mortised cost, as deemed appropriate.

4.15 Financial instruments

The Company initially recognises insurance receivables and insurance payables on the date at which they are originated. All other financial assets and liabilities (including assets and liabilities designated at fair value through profit or loss) are initially recognised on the trade date at which the Company becomes party to the contractual provision of the instrument.

A financial asset or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.15 Financial instruments (continued)

Financial assets measured at amortised cost

At inception, a financial asset is classified as measured at amortised cost or fair value.

A financial asset qualifies for amortised cost measurement only if it meets both of the following two conditions:

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cashflows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

If a financial asset does not meet both of these conditions, then it is measured at fair value.

The Company makes an assessment of a business model at portfolio level as this reflect the best way the business is managed and information is provided to the management.

In making an assessment of whether an asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows, the Company considers:

- management's stated policies and objectives for the portfolio and the operation of those policies in practice;
- how management evaluates the performance of the portfolio;
- whether management's strategy focus on earning contractual interest revenue;
- the degree of frequency of any expected asset sales;
- the reason of any asset sales; and
- whether assets that are sold are held for an extended period of time relative to their contractual maturity or are sold shortly after acquisition or an extended time before maturity.

Financial assets including cash and cash equivalents, deposits/statutory deposits, and investments at amortised cost are initially recognised at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, these are measured at amortised cost using the effective interest method.

Equity instruments at FVOCI

Investments in equity instruments at FVOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the cumulative changes in fair value reserve. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the investments in equity instruments/funds, but reclassified to retained earnings.

Dividends on these investments in equity instruments are recognised in profit or loss when the Company's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI and are never reclassified to profit or loss.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.15 Financial instruments (continued)

Debt instruments at amortised cost

At initial recognition of a financial asset, the Company determines whether newly recognised financial assets are part of an existing business model or whether they reflect the commencement of a new business model. The Company reassess its business models each reporting period to determine whether the business models have changed since the preceding period. For the current and prior reporting period, the Company has not identified a change in its business models.

Debt instruments that are held within a business model whose objective is to collect contractual cash flows and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPL) are subsequently measured at amortised cost.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

Debt instruments that are subsequently measured at amortised cost are subject to impairment.

Financial assets measured at fair value through profit or loss

Financial assets at FVTPL are:

- (i) assets with contractual cash flows that are not SPPI; or/and
- (ii) assets that are held in a business model other than held to collect contractual cash flows or held to collect and sell; or
- (iii) assets designated at FVTPL using the fair value option.

These assets are measured at fair value, with any gains/losses arising on remeasurement recognised in profit or loss.

Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, balances with the banks and deposits with original maturities of three months or less from the acquisition date that are subject to insignificant risk of changes in their fair value, and are used by the Company in the management of short-term commitments. Cash and cash equivalents are carried at amortised cost in the statement of financial position.

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Equity instruments

Ordinary shares of the Company are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.15 Financial instruments (continued)

Financial assets measured at fair value through profit or loss (continued)

Provision for expected credit loss

The Company recognises a loss for expected credit losses on investments in debt instruments that are measured at amortised cost, deposits and bank balances. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Company always recognises lifetime ECL (expected credit losses) for other receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

The Company measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- Debt investment securities that are determined to have low credit risk at the reporting date; and
- Other financial instruments on which credit risk has not increased significantly since their initial recognition.

The Company considers a debt security to have low credit risk when their credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Company utilises the general approach to calculate ECL against its deposits with banks and for its investments in debt securities which is dependent on the rating of the banks and bonds as determined by an external credit rating agency.

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Lifetime ECLs are ECLs that result from all possible default events over the expected life of a financial instrument.

The key inputs into the measurement of ECL are the term structure of the following variables:

- Probability of default (PD);
- Loss given default (LGD);
- Exposure at default (EAD).

These parameters are generally derived from internally developed statistical models and other historical data. They are adjusted to reflect forward-looking information.

The Company has adopted simplified approach in case of other receivables. In case of financial assets for which simplified approach is adopted lifetime expected credit loss is recognised.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.15 Financial instruments (continued)

Financial assets measured at fair value through profit or loss (continued)

Provision for expected credit loss (continued)

Details of these statistical parameters/inputs are as follows:

PD - The probability of default is an estimate of the likelihood of default over a given time horizon.

LGD - The loss given default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

EAD - The exposure at default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date.

Forward-looking information

The measurement of expected credit losses considers information about past events and current conditions as well as reasonable and supportable forecasts of future events and economic conditions. The estimation and application of forward-looking information requires significant judgement.

Macroeconomic factors

In its models, the Company relies on a broad range of forward looking information as economic inputs, such as: GDP, GDP annual growth rate, unemployment rates, inflation rates, interest rates, etc. Various macroeconomic variables considered are Brent, CPI, Stock, Inflation and Loans to private sector.

The inputs and models used for calculating expected credit losses may not always capture all characteristics of the market at the date of the financial statements.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for ECL are presented in the statement of financial position as follows:

Financial assets measured at amortised cost: as a deduction from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Company has a policy of writing off the gross carrying amount when the financial asset is irrecoverable. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.15 Financial instruments (continued)

Fair value of financial instruments

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations, without any deduction for transaction costs. For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include:

- Using recent arm's length market transactions;
- Reference to the current fair value of another instrument that is substantially the same A discounted cash flow analysis or other valuation models.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets. The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortised cost is recognised in other comprehensive income with a corresponding charge to profit or loss. The accumulated gain recognised in other comprehensive income is recycled to the profit or loss upon derecognition of the assets.

Financial liabilities

Insurance liabilities, account payable are classified as 'other financial liabilities' and are initially measured at fair value, net of transaction costs. Other financial liabilities (except for deferred commission income) are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis except for short term payable when the recognition of interest would be immaterial.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

4. Summary of significant accounting policies (continued)

4.16 De-recognition of financial instruments

The Company derecognises a financial asset when the contractual right to the cash flows from the financial asset expire, or when it transfers the financial asset in a transaction in which substantially all the risk and rewards of the ownership are transferred or in which the Company neither transfers nor retains substantially all the risks and rewards of ownership and it does not retain control on the financial asset. Any interest in transferred financial assets that qualify for derecognition that is carried or retained by the Company is recognised as separate asset or liability in the statement of financial position. On derecognition of financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset transferred), and consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss.

The Company enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all or substantially all of the risks and rewards of the financial assets or a portion of them. If all or substantially all risks and rewards are retained, then the transferred assets are not derecognised.

In transactions in which the Company neither retains nor transfers substantially all the risks and rewards of ownership of a financial asset and it retains control over the asset, the Company continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

In certain transactions the Company retains the obligation to service the transferred financial asset for a fee. The transferred asset is derecognised if it meets the derecognition criteria. An asset or liability is recognised for the servicing contract, depending on whether the servicing fee is more than adequate (asset) or is less than adequate (liability) for performing the services.

The Company derecognises a financial liability when its contractual obligation are discharged or cancelled or expire.

4.17 Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividend is approved by the Company's shareholders.

4.18 Offsetting

Financial assets and liabilities are offset and the net amount is reported in the statement of financial position when, and only when, the Company has a legally enforceable right to offset the recognised amounts audit intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRSs, or of gains and losses arising from a group of similar transactions such as in the Company's trading activity.

5. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in Note 4 to these financial statements, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

5. Critical accounting judgements and key sources of estimation uncertainty (continued)

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

5.1 Critical accounting judgements

The following are the critical judgements, apart from those involving estimations (see 5.2 below), that management has made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

5.1.1 Classification of investments

Management decides on acquisition of an investment whether it should be classified as FVOCI, or Investments at amortised cost.

Equity instruments are classified as FVOCI securities when they are considered by management to be strategic equity investments that are not held to benefit from changes in their fair value and are not held for trading.

Management is satisfied that the Company's investments in securities are appropriately classified.

5.1.2 Classification of properties

In the process of classifying properties, management has made various judgments. Judgments are needed to determine whether a property qualifies as an investment property, property and equipment, property under development and/or property held for sale. Management develops criteria so that it can exercise that judgment consistently in accordance with the definitions of investment property, property and equipment, property under development and property held for sale. In making its judgment, management has considered the detailed criteria and related guidance set out in IAS 2 – Inventories, IAS 16 – Property, Plant and Equipment, and IAS 40 – Investment Property, with regards to the intended use of the property.

5.1.3 Business model assessment

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Company monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. No such changes were required during the years presented.

5.1.4 Insurance contract classification

Contracts are classified as insurance contracts where they transfer significant insurance risk from the holder of the contract to the Company.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

5. Critical accounting judgements and key sources of estimation uncertainty (continued)

5.1 Critical accounting judgements (continued)

5.1.4 Insurance contract classification (continued)

There are a number of contracts sold where the Company exercises judgement about the level of insurance risk transferred. The level of insurance risk is assessed by considering whether there are any scenarios with commercial substance in which the Company is required to pay significant additional benefits. These benefits are those which exceed the amounts payable if no insured event were to occur. These additional amounts include claims liability and assessment costs, but exclude the loss of the ability to charge the holder of the contract for future services.

5.1.5 Significant increase in credit risk

ECL are measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL assets for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial recognition. IFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased, the Company takes into account qualitative and quantitative reasonable and supportable forward looking information.

5.1.6 Going concern

Management has made an assessment of the Company's ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue a going concern. Therefore, the financial statements are prepared on a going concern basis.

5.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

5.2.1 Individual life insurance

The assumptions used in the actuarial valuations for life fund are consistently applied and these assumptions are based on mortality and withdrawal rate assumptions.

5.2.2 Provision for outstanding claims, incurred or not

The estimation of ultimate liability arising from the claims made under insurance contracts is the Company's most critical accounting estimate. There are sources of uncertainty that need to be considered in the estimate of the liability that the Company will eventually pay for such claims. Estimates have to be made at the end of the reporting period for both the expected ultimate cost of claims reported and for the expected ultimate cost of claims incurred but not reported ("IBNR"). Liabilities for unpaid reported claims are estimated using the input of assessments for individual cases reported to the Company and management estimates based on past claims settlement trends for the claims incurred but not reported. At the end of each reporting period, prior year claims estimates are reassessed for adequacy and changes are made to the provision.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

5. Critical accounting judgements and key sources of estimation uncertainty (continued)

5.2 Key sources of estimation uncertainty (continued)

5.2.2 Provision for outstanding claims, incurred or not (continued)

The Company has performed an assessment of the impact of COVID-19 on its contractual arrangements and provisions for outstanding claims and claims incurred but not reported which included regular sensitivity analyses. The Company determined that there is no material impact on its risk position and provision balances for outstanding claims and claims incurred but not reported, as at 31 December 2021. The Company will continue monitoring its claims experience and the developments around the pandemic and revisit the assumptions and methodologies in future reporting periods.

5.2.3 Calculation of loss allowance

When measuring ECL the Company uses reasonable and supportable forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other. Loss given default is an estimate of the loss arising on default. Forward looking factor considered as the GDP of U.A.E.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

5.2.4 Liability adequacy test

At each statement of financial position date, liability adequacy tests are performed to ensure the adequacy of insurance contract liabilities. The Company makes use of the best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities in evaluating the adequacy of the liability. Any deficiency is immediately charged to the profit or loss.

5.2.5 Valuation of investment properties

The fair value of investment properties were determined by external independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the properties being valued. The independent valuers provide the fair value of the Company's investment properties portfolio annually.

5.2.6 Depreciation of property and equipment

The cost of property and equipment is depreciated over the estimated useful life, which is based on expected usage of the asset, expected physical wear and tear, the repair and maintenance program and technological obsolescence arising from changes and the residual value. Management has not considered any residual value as it is deemed immaterial.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

5. Critical accounting judgements and key sources of estimation uncertainty (continued)

5.2 Key sources of estimation uncertainty (continued)

5.2.7 Impairment of Premium and insurance balances receivable

The Company has adopted deferral approach on application of IFRS 9 on the IFRS 4 generated financial assets and therefore, ECL has not been applied to premium and insurance balances receivable and incurred loss model under IAS 39 has been applied. An estimate of the collectible amount of premium and insurance balances receivable is made when collection of the full amount is no longer probable. For individually significant amounts, the estimation is performed on an individual basis. Amounts which are not individually significant, but which are past due, are assessed collectively and a provision applied according to the length of time past due, based on historical recovery rates.

The Company is exposed to disputes with, and possibility of defaults by, its reinsurers. The Company monitors on a quarterly basis the evolution of disputes with credit ratings and solvency strength of its reinsurers. Any significant credit risk increase could result in impairment of premium and insurance balances receivable.

6. Property and equipment

	Land AED	Building AED	Furniture and fixtures AED	Office equipment AED	Motor vehicles AED	Capital work-in progress AED	Total AED

As at 31 December 2021, the cost of fully depreciated property and equipment that was still in use amounted to AED 8,430,227 (2020: AED 6,970,805).

Property and equipment are located in U.A.E.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

7. Investment properties

	2021	2020
	AED	AED
Balance, at the beginning of the year	200,440,000	205,786,000
Change in fair value	7,098,000	(5,346,000)
	<hr/>	<hr/>
Balance, at the end of the year	207,538,000	200,440,000
	<hr/> <hr/>	<hr/> <hr/>

Investment properties comprises two commercial buildings in Dubai, United Arab Emirates.

The fair value of the Company's investment properties as at 31 December 2021 has been arrived at on the basis of valuations carried on the reporting date by independent valuers who are not related to the Company and have appropriate qualifications and recent market experience in the valuation of properties in the United Arab Emirates.

The fair value was determined based on the net income capitalisation method, where the market rentals of all lettable units of the properties are assessed by reference to the rental achieved in the lettable units. The capitalisation rate adopted is determined by reference to the yield rates observed by the valuers for similar properties in the locality and adjusted based on the valuers' knowledge of the factors specific to the respective property. In estimating the fair value of the properties, the highest and best use of the properties is their current use. The Company's investment properties are classified as Level 3 in the fair value hierarchy as at 31 December 2021 (2020: Level 3).

The rental income and operating expenses relating to these properties are as follows:

	2021	2020
	AED	AED
Rental income (Note 24)	14,618,645	16,628,576
Maintenance expenses	(5,123,887)	(4,891,748)
	<hr/>	<hr/>
Net rental income	9,494,758	11,736,828
	<hr/> <hr/>	<hr/> <hr/>

Notes to the financial statements

This note provides a summary of actuarial technical provisions calculated and certified by external actuary.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

10. Technical provisions (continued)

10.2 Mathematical reserve

	2021	2020
	AED	AED
At January	509,557,358	550,230,308
Shortage of income over expenditure for the year in the long-term business	(8,812,578)	(17,533,111)
Surplus available	(22,529,649)	(23,139,839)
	478,215,131	509,557,358
	(31,342,227)	(40,672,950)

Mathematical reserve represents amounts set aside to meet the aggregate amount of the liabilities of the Company in relation to its long-term life business as at 31 December 2021.

Actuary determined the liability arising out of the actuarial valuation of individual life (life assurance fund) to be as follows:

	2021	2020
	AED	AED
Net liabilities under insurance policies	377,177,894	394,093,203
Provision for terminal bonus to policyholders	101,037,237	115,464,155
	478,215,131	509,557,358

11. Deferred acquisition costs

	2021	2020
	AED	AED
Balance at the beginning of the year	5,937,160	3,050,501
Acquisition costs paid during the year	7,710,404	21,389,773
Amortisation charge for the year	(11,243,865)	(18,503,114)
	2,403,699	5,937,160

12. Premium and insurance balances receivable

	2021	2020
	AED	AED
Due from policyholders	52,590,134	47,102,097
Due from insurance or reinsurance companies	4,730,505	3,961,037
Due from brokers or agents	26,857,160	27,134,174
Less: Provision for impairment (Note 12.1)	(3,486,567)	(3,272,453)
	80,691,232	74,924,855

16.1 Movement in the provision for expected credit losses as follows:

	2021 AED	2020 AED
Balance at beginning of the year	22,632	53,600
Provision/(reversal) during the year	51,195	(30,968)
Balance at end of the year	73,827	22,632

17. Share capital

	2021 AED	2020 AED
Authorised, issued and fully paid 1,000,000 shares of AED 100 each (31 December 2020: 1,000,000 shares of AED 100 each)	100,000,000	100,000,000

18. Reserves

18.1 Statutory reserve

In accordance with the Company's Articles of Association and Federal Law No. (2) of 2015 (as amended), a minimum of 10% of the Company's profit for the year should be transferred to a non-distributable statutory reserve. As per the Company's Articles of Association, such transfers are required until the balance on the statutory reserve equals 100% of the Company's paid-up share capital. Accordingly, AED 4,112,121 (2020: AED 4,214,021) was transferred to the statutory reserve on 31 December 2021.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

18. Reserves (continued)

18.2 Regular reserve

In accordance with the Company's Articles of Association, at least 10% of the Company's profit must be transferred to regular reserve. Such transfers are required until the balance on this reserve equals 100% of the Company's paid-up share capital, or until the transfer is discontinued by resolution of the shareholders. Accordingly, AED 4,112,121 (2020: AED 4,214,021) was transferred to the regular reserve on 31 December 2021.

18.3 General reserve

The Board of Directors approved the transfer of AED nil in 2021 (2020: AED 5,000,000) to a general reserve which can be utilized for any purpose approved by the shareholders as per the Articles of Association of the Company.

18.4 Reinsurance reserve

In accordance with Article 34 issued by the Central Bank of the United Arab Emirates ("CBUAE"), Board of Directors Decision No. (23) of 2019 the Company has created a reinsurance reserve amounting to AED 900,805 in 2021 (2020: AED 869,651), being 0.5% of the total reinsurance premiums ceded by the Company in the United Arab Emirates in all classes of business. The Company shall accumulate such reserve year on year and not dispose off the reserve without the written approval of the Director General of the Central Bank of the United Arab Emirates ("CBUAE").

19. Provision for employees' end of service indemnity

	2021	2020
	AED	AED
Balance at the beginning of the year	4,984,443	5,242,910

	2021	2020
	AED	AED
Other income and administration income	2,145,530	1,581,655
	<hr/> <hr/>	<hr/> <hr/>

Notes to the financial statements
For the year ended 31 December 2021 (continued)

26. General and administrative expenses

	2021	2020
	AED	AED
Staff costs	20,360,844	20,252,625
Rent	1,530,852	1,602,661
Bank charges	1,305,547	1,379,054
Depreciation on property and equipment (Note 6)	726,516	946,145
Communication expenses	365,934	417,226
Travel and conveyance	22,685	22,551
Other expenses	3,770,568	4,261,000
	28,082,946	28,881,262

Other expenses include social contributions made during the year amounted to AED 150,000 (2020: AED 1,000,000).

27. Basic and diluted earnings per share

	2021	2020
Profit for the year (in AED)	41,121,212	42,140,206
Weighted average number of shares	1,000,000	1,000,000
Basic and diluted earnings per share (in AED)	41.12	42.14

Basic earnings per share is calculated by dividing the profit for the year by the number of weighted average shares outstanding at the end of the reporting period. Diluted earnings per share is equivalent to basic earnings per share as the Company did not issue any new instrument that would impact earnings per share when executed.

28. Related party transactions

Related parties include the Company's major Shareholders, Directors and businesses controlled by them and their families over which they exercise significant management influence as well as key management personnel.

28.1 At the end of the reporting period, amounts due from related parties are as follows:

	2021	2020
	AED	AED
Due from related parties (Key Management personnel and entities under common control)	1,264,268	1,253,171

The above balances are included as part of premiums and insurance balances receivables.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

28. Related party transactions (continued)

28.2 During the year, the Company entered into the following transactions with related parties:

	2021	2020
	AED	AED
Premiums from related parties (Key Management personnel and entities under common control)	4,585,846	4,758,533
Claims to related parties (Key Management personnel and entities under common control)	114,783	763,142

Transactions are entered with related parties at rates agreed with management.

28.3 Compensation of key management personnel

	2021	2020
	AED	AED
Directors' remuneration	1,115,883	1,148,490
Short term benefits	1,650,000	1,950,000
Total compensation paid to the key management personnel	2,765,883	3,098,490

Pursuant to Article 169 of Federal Law No. 2 of 2015 (as amended) and in accordance with the Articles of Association of the Company, the Directors are entitled for remuneration which shall not exceed 10% of the net profits after deducting depreciation and reserves.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

31. Contingent liabilities

	2021	2020
	AED	AED
Letters of guarantee	10,567,186	10,853,330

The Company in common with the significant majority of insures, is subject to litigation in normal course of its business. The Company, based on independent legal advice, does not expect that the outcome of these court cases will have a material impact on the Company's financial performance or financial position.

32. Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the nature of an insurance contract, this risk is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of claims. The objective of the Company is to ensure that sufficient reserves are available to cover these liabilities.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the estimate established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

The Company manages risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling. The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk, industry and geography. Underwriting limits are in place to enforce appropriate risk selection criteria, as well as the use of reinsurance arrangements.

32.1 Frequency and severity of claims

The Company has the right not to renew individual policies, re-price the risk, impose deductibles and reject the payment of a fraudulent claim. Insurance contracts also entitle the Company to pursue third parties for payment of some or all costs (for example, subrogation).

Property insurance contracts are underwritten by reference to the commercial replacement value of the properties and contents insured, and claim payment limits are always included to cap the amount payable on occurrence of the insured event. Cost of rebuilding properties, of replacement or indemnity for contents and time taken to restart operations for business interruption are the key factors that influence the level of claims under these policies. Property insurance contracts are subdivided into four risk categories: fire, business interruption, weather damage and theft. The insurance risk arising from these contracts is not concentrated in any of the territories in which the Company operates, and there is a balance between commercial and personal properties in the overall portfolio of insured buildings.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

32. Insurance risk (continued)

32.1 Frequency and severity of claims (continued)

The reinsurance arrangements include excess and catastrophe coverage. The effect of such reinsurance arrangements is that the Company should not suffer net insurance losses of a set limit of AED 250,000 for motor and AED 12,000 for medical class of business in any one policy. The Company has survey units dealing with the mitigation of risks surrounding claims. This unit investigates and recommends ways to improve risk claims. The risks are reviewed individually at least once a year and adjusted to reflect the latest information on the underlying facts, current law, jurisdiction, contractual terms and conditions, and other factors. The Company actively manages and pursues early settlements of claims to reduce its exposure to unpredictable developments.

32.2 Sources of uncertainty in the estimation of future claim payments

Claims on insurance contracts are payable on a claims-occurrence basis. The Company is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time and element of the claims provision includes incurred but not reported claims (IBNR). The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Company, where information about the claim event is available. IBNR claims may not be apparent to the insured until many years after the event that gave rise to the claims. For some insurance contracts, the IBNR proportion of the total liability is high and will typically display greater variations between initial estimates and final outcomes because of the greater degree of difficulty of estimating these liabilities. In estimating the liability for the cost of reported claims not yet paid, the Company considers information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. Apart from internal actuary, the Company has involved independent external actuarial valuer's as well. Large claims are assessed on a case-by-case basis or projected separately in order to allow for the possible distortive effect of their development and incidence on the rest of the portfolio.

The estimated cost of claims includes direct expenses to be incurred in settling claims, net of the expected subrogation value and other recoveries. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established.

The amount of insurance claims is particularly sensitive to the level of court awards and to the development of legal precedent on matters of contract and tort. Insurance contracts are also subject to the emergence of new types of latent claims, but no allowance is included for this at the reporting date.

Where possible, the Company adopts multiple techniques to estimate the required level of provisions. This provides a greater understanding of the trends inherent in the experience being projected. The projections given by the various methodologies also assist in estimating the range of possible outcomes. The most appropriate estimation technique is selected taking into account the characteristics of the business class and the extent of the development of each accident year.

In calculating the estimated cost of unpaid claims (both reported and not), the Company's estimation techniques are a combination of loss-ratio-based estimates and an estimate based upon actual claims experience using predetermined formulae where greater weight is given to actual claims experience as time passes. The initial loss-ratio estimate is an important assumption in the estimation technique and is based on previous years' experience, adjusted for factors such as premium rate changes, anticipated market experience and historical claims inflation. The initial estimate of the loss ratios used for the current year (before reinsurance) are analysed by type of risk where the insured operates for current and prior year premiums earned.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

32. Insurance risk (continued)

32.2 Sources of uncertainty in the estimation of future claim payments (continued)

The initial estimate of the loss ratios used for the current year before and after reinsurance are analysed below by type of risk where the insured operates for current and prior year premium earned.

Type of risk	2021		2020	
	Gross loss ratio	Net loss ratio	Gross loss ratio	Net loss ratio
Life insurance	4.69%	2.74%	3.34%	2.10%
Non-life insurance	33.71%	99.27%	17.22%	39.57%

There are no single insurance contract, or a small number of related contracts that might cause significant loss to the company in case of occurrence of such insured liability.

Below table shows the impact on profit of a change of 1% in the loss for both gross and net of reinsurance recoveries would be as follows:

Type of risk	2021		2020	
	Gross loss ratio AED	Net loss ratio AED	Gross loss ratio AED	Net loss ratio AED
Impact of an increase of 1% in loss ratio	(2,309,028)	(942,945)	(3,643,846)	(1,277,385)
Impact of a decrease of 1% in loss ratio	2,309,028	942,945	3,643,846	1,277,385

32.3 Process used to decide on assumptions

The risks associated with these insurance contracts are complex and subject to a number of variables that complicate quantitative sensitivity analysis. Internal data is derived mostly from the Company's quarterly claims reports and screening of the actual insurance contracts carried out at the end of the reporting period to derive data for the contracts held. The Company has reviewed the individual contracts and in particular the industries in which the insured companies operate and the actual exposure years of claims. This information is used to develop scenarios related to the latency of claims that are used for the projections of the ultimate number of claims.

The choice of selected results for each accident year of each class of business depends on an assessment of the technique that has been most appropriate to observed historical developments. In certain instances, this has meant that different techniques or combinations of techniques have been selected for individual accident years or groups of accident years within the same class of business. The Company has an internal actuary and independent external actuaries are also involved in the valuation of technical reserves of the Company.

32.4 Claims development process

Claims development tables are disclosed in order to put the unpaid claims estimates included in the financial statements into a context, allowing comparison of the development claims provisions with those seen in previous years.

In effect, the table highlights the Company's ability to provide an estimate of the total value of claims. This table provides a review of current estimates of cumulative claims and demonstrates how the estimated claims have changed at subsequent reporting or accident year ends. The estimate is increased or decreased as losses are paid and more information becomes known about the frequency and severity of unpaid claims. Data in the table related to acquired businesses is included from the acquisition date onwards.

The Company believes that the estimates of total claims outstanding as of the end of 2021 are adequate. However, due to the inherent uncertainties in the reserving process, it cannot be assured that such balances will ultimately prove to be adequate.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

32. Insurance risk (continued)

32.4 Claims development process (continued)

The table below illustrates development of the net outstanding and incurred but not reported claims at the end of each year together with cumulative payments subsequent to the year of accident:

	Prior years AED	2017 AED	2018 AED	2019 AED	2020 AED	2021 AED
At the end of each reporting year	-	18,647,402	23,802,251	26,859,096	23,158,971	32,884,091
One year later	-	19,970,601	20,495,050	33,019,324	20,355,676	-
Two years later	-	20,637,918	30,726,839	24,256,781	-	-
Three years later	-	20,773,823	30,091,839	-	-	-
Four years later	-	20,737,535	-	-	-	-
Prior years	44,317,117	-	-	-	-	-
Estimate of cumulative claims	<u>44,317,117</u>	<u>20,737,535</u>	<u>30,091,839</u>	<u>24,256,781</u>	<u>20,355,676</u>	<u>32,884,091</u>
Cumulative payments to date	<u>(44,317,117)</u>	<u>(20,737,535)</u>	<u>(30,089,611)</u>	<u>(23,885,691)</u>	<u>(19,376,439)</u>	<u>(23,395,105)</u>
Total reserves included in the balance sheet	<u>-</u>	<u>-</u>	<u>2,228</u>	<u>371,090</u>	<u>979,237</u>	<u>9,488,986</u>

The above table does not include cumulative claims for insurance of persons and fund accumulation operations.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

32. Insurance risk (continued)

32.5 Concentration of insurance risk

Substantially all of the Company's underwriting activities are carried out in the United Arab Emirates. In common with other insurance companies, in order to minimise financial exposure arising from large insurance claims, the Company, in the normal course of business, enters into arrangement with other parties for reinsurance purposes.

To minimise its exposure to significant losses from reinsurer insolvencies, the Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of the reinsurers. Reinsurance ceded contracts do not relieve the Company from its obligations to policyholders. The Company remains liable to its policyholders for the portion reinsured to the extent that any reinsurer does not meet the obligations assumed under the reinsurance agreements.

32.6 Sensitivity of underwriting profit

The Company does not foresee any adverse change in the contribution of insurance profit due to the following reasons:

- The Company has an overall risk retention level of 41% for the year ended 31 December 2021 (2020: 46%). This is mainly due to low retention levels in general accident, fire and engineering. However, for other lines of business, the Company is adequately covered by excess of loss reinsurance programs to guard against major financial impact.
- The Company has commission income of AED 15,439,522 in 2021 (2020: AED 15,856,373) predominantly from the reinsurance placement which remains a comfortable source of income.

Because of low risk retention of 41% during the year (2020: 46%) of the volume of the business and limited exposure in high retention areas such as motor, the Company is comfortable to maintain an overall net loss ratio of 23.89% (2020: 14.46%) and does not foresee any serious financial impact in the net underwriting profit.

32.7 Coronavirus (COVID-19) outbreak and its impact on the Company

With the recent and rapid development of the coronavirus disease (COVID-19) outbreak, the world economy entered a period of unprecedented health care crisis that has already caused considerable global disruption in business activities and everyday life. Certain countries including the United Arab Emirates (UAE) have adopted extraordinary and economically costly containment measures and have required companies to limit or even suspend normal business operations.

Management has considered the unique circumstances and the risk exposures of the Company that could have a material impact on the business operations and has concluded that the main impacts on the Company's profitability/liquidity position may arise from:

- recoverability of premium and insurance balances receivable,
- unavailability of personnel,
- reduction in gross premium due to non-renewal of policies,
- provision for outstanding claims and claims incurred but not reported,
- fair value measurement of financial instruments and investment properties held by the Company.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

32. Insurance risk (continued)

32.7 Coronavirus (COVID-19) outbreak and its impact on the Company (continued)

The Company is required to assess adequacy of insurance contract liabilities at each reporting date. Due to exceptional circumstance and uncertain market conditions, the Company's actuary had special considerations on inputs and assumption for assessment of technical reserves with reference to assessment of company's exposure, insurance contract inclusion and exclusion clauses related to pandemic, potential irregular claim ratios, etc.

Substantial portfolio of the Company consists of investments that are carried at amortised cost which approximate their fair market value. The Company believes that the carrying value include the impact of Covid 19 and hence the investment portfolio is adjusted for the impact of Covid 19.

Based on the above consideration, management has concluded that there is no significant impact on the Company's profitability position as at reporting date.

Further, the Company has performed stress testing as required by the Central Bank of the United Arab Emirates ("CBUAE") approved by the Board of Directors, who are satisfied that the Company will continue to operate as a going concern. Accordingly, these financial statements have been prepared on a going concern basis. Management will continue to monitor the situation and, will take necessary and appropriate actions on a timely basis to respond to this unprecedented situation.

33. Capital risk management

The Company's objectives when managing capital are:

- to comply with the insurance capital requirements required by U.A.E. Federal Law No. 6 of 2007, on Establishment of Insurance Authority and Organization of its Operations.
- to safeguard the Company's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- to provide an adequate return to shareholders by pricing insurance contracts commensurately with the level of risk.

In U.A.E., Central Bank of the United Arab Emirates ("CBUAE") specifies the minimum amount and type of capital that must be held by the Company in addition to its insurance liabilities. The minimum required capital (presented in the table below) must be maintained at all times throughout the year.

As per Article (8) of Section (2) of financial regulations issued for insurance companies in UAE, the Company shall at all times comply with the requirement of solvency margins.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

33. Capital risk management (continued)

As at 31 December 2021, the Company had a solvency surplus of AED 309.6 million (2020: AED 243.2 million) as compared to the Minimum Capital requirements of AED 100 million (2020: AED 100 million).

	2021	2020
	AED	AED
Minimum Capital requirement (MCR)	100,000,000	100,000,000
Solvency Capital requirement (SCR)	143,753,744	136,740,415
Minimum Guarantee Fund (MGF)	47,917,915	45,580,138
Own Funds	-	-
Basic Own Funds	409,587,624	343,172,593
Ancillary Own Funds	-	-
MCR Solvency Margin Surplus	309,587,624	243,172,593
SCR Solvency Margin Surplus	265,833,881	206,432,178
MGF Solvency Margin Surplus	361,669,710	297,592,455

34. Financial instruments

The Company is exposed to a range of financial risks through its financial assets, financial liabilities, reinsurance assets and insurance liabilities. In particular, the key financial risk is that in the long-term its investment proceeds are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important components of this financial risk are interest rate risk, equity price risk, foreign currency risk and credit risk.

34.1 Significant accounting policies

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in Note 4 to the financial statements.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

34. Financial instruments (continued)

34.2 Classification of financial instruments

The tables below sets out the Company's classification for each class of financial assets and liabilities and their carrying amount as at 31 December 2021:

	FVOCI	Amortised	Total
	AED	cost	AED
		AED	
Financial assets			
Investments at amortised cost (Note 8.1)	-	333,077,974	333,077,974
Investments carried at FVOCI (Note 8.2)	6,888,342	-	6,888,342

Total	<u>-</u>	<u>815,808,415</u>	<u>815,808,415</u>

Notes to the financial statements
For the year ended 31 December 2021 (continued)

34. Financial instruments (continued)

34.2 Classification of financial instruments (continued)

The tables below sets out the Company's classification for each class of financial assets and liabilities and their carrying amount as at 31 December 2020:

	FVOCI	Amortised	Total
	AED	cost	AED
Financial assets		AED	AED
Investments at amortised cost (Note 8.1)	-	335,622,610	335,622,610
Investments carried at FVOCI (Note 8.2)	5,175,180	-	5,175,180
Reinsurance contract assets (Note 10)	-	192,691,454	192,691,454
Premium and insurance balance receivable (Note 12)	-	74,924,855	74,924,855
Other receivables and prepayments (excluding prepayments) (Note 13)	-	19,948,414	19,948,414
Loans guaranteed by life insurance policies (Note 9)	-	48,458,780	48,458,780
Statutory deposits (Note 14)	-	10,000,000	10,000,000
Deposits (Note 15)	-	498,471,334	498,471,334
Cash and cash equivalents (Note 16)	-	48,691,929	48,691,929
Total	5,175,180	1,228,809,376	1,233,984,556
	<hr/>	<hr/>	<hr/>
Financial liabilities			
Insurance contract liabilities (Note 10)	-	742,809,089	742,809,089
Accounts payable (excluding rent received in advance) (Notes 20 and 20.1)	-	82,514,588	82,514,588
Insurance liabilities (Note 21)	-	74,436,991	74,436,991
Total	-	899,760,668	899,760,668
	<hr/>	<hr/>	<hr/>

Management considers that the carrying amounts of financial assets and financial liabilities recorded in the financial statements approximate their fair values, except for the investments at amortised cost and disclosed in Note 8 of these financial statements.

34.3 Fair value measurements

The fair values of financial assets and financial liabilities are determined as follows:

- The fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market bid prices at the close of the business on the reporting date.
- The fair values of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

34. Financial instruments (continued)

34.4 Fair value of financial instruments carried at amortised cost

Management considers that the carrying amounts of financial assets and financial liabilities recognised at amortised cost in the financial statements approximate their fair values except for financial investments measured at amortised cost of which fair value is determined based on the quoted market prices and disclosed in Note 8 of these financial statements.

Valuation techniques and assumptions applied for the purposes of measuring fair value

34.4.1 Fair value measurements recognised in the statement of financial position

The following table gives information about how the fair values of these financial assets are determined:

Financial assets	Fair value as at 2021 AED	2020 AED	Fair value hierarchy	Valuation techniques and key inputs	Significant unobservable input	Relationship of unobservable inputs to fair value
Quoted equity securities	6,888,342	5,175,180	Level 1	Quoted bid prices in an active market.	None.	NA

There were no transfers between each of level during the period. There are no financial liabilities which should be measured at fair value and accordingly no disclosure is made in the above table.

34.5 Market risk

The Company's activities expose it primarily to the financial risks of changes in foreign currency exchange rates and interest rates.

Market risk exposures are measured using sensitivity analysis. There has been no change to the Company's exposure to market risks or the manner in which it manages and measures the risk.

34.6 Foreign currency risk

There are no significant exchange rate risks as substantially all financial assets and financial liabilities are denominated in Arab Emirates Dirhams, other G.C.C. currencies or US Dollars to which the Dirham is fixed.

34.7 Credit risk

Credit risk refers to the risk that a counter party will default on its contractual obligations resulting in financial loss to the Company.

Key areas where the Company is exposed to credit risk are:

- reinsurers' share of insurance liabilities;
- amounts due from reinsurers in respect of claims already paid;
- amounts due from insurance contract holders; and
- amounts due from insurance intermediaries;

Notes to the financial statements
For the year ended 31 December 2021 (continued)

34. Financial instruments (continued)

34.7 Credit risk (continued)

The Company has adopted a policy of dealing with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults. The Company's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by Management annually.

Reinsurance is used to manage insurance risk. This does not, however, discharge the Company's liability as primary insurer. If a reinsurer fails to pay a claim for any reason, the Company remains liable for the payment to the policyholder. The creditworthiness of reinsurers is considered on an annual basis by reviewing their financial strength prior to finalisation of any contract.

The Company maintains records of the payment history for significant contract holders with whom it conducts regular business. The exposure to individual counterparties is also managed by other mechanisms, such as the right of offset where counterparties are both debtors and creditors of the Company. Management information reported to the Company includes details of provisions for impairment on insurance receivables and subsequent write-offs. Exposures to individual policyholders and groups of policyholders are collected within the ongoing monitoring of the controls. Where there exists significant exposure to individual policyholders, or homogenous groups of policyholders, a financial analysis equivalent to that conducted for reinsurers is carried out by the Company.

The following table provides an age analysis of premium and insurance balance receivables:

31 December 2021	Neither past due nor impaired AED	3 to 6 months AED	7 to 9 months AED	10 to 12 months AED	More than 12 months AED	Total AED
Gross carrying amount – insurance and reinsurance receivables	36,844,470	25,949,832	5,549,472	4,787,894	11,046,131	84,177,799

Notes to the financial statements
For the year ended 31 December 2021 (continued)

34. Financial instruments (continued)

34.7 Credit risk (continued)

Insurance receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of insurance receivable.

The Company has no significant concentration of credit risk, with exposure spread over a large number of counterparties and customers. The Company defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

The carrying amount of financial assets recorded in the financial statements, which is net of impairment losses, represents the Company's maximum exposure to credit risk.

Notes to the financial statements
For the year ended 31 December 2021 (continued)

34. Financial instruments (continued)

34.8 Liquidity risk

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has built an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below summarises the maturity profile of the Company's financial instruments. The contractual maturities of the financial instruments have been determined on the basis of the remaining period at the reporting date to the contractual maturity date. The maturity profile is monitored by management to ensure adequate liquidity is maintained.

	Less than 1 year AED	1 to 5 years AED	Over 5 years AED	No maturity date AED	Total AED
31 December 2021

Loans guaranteed by life insurance policies (Note 9)	-	48,458,780	-	-	48,458,780
Deposits (Note 15)	435,360,698	63,110,636	-	-	498,471,334
Statutory deposits (Note 14)	-	-	-	10,000,000	10,000,000
Cash and cash equivalents (Note 16)	48,691,929	-	-	-	48,691,929
	<u>771,300,639</u>	<u>406,987,673</u>	<u>40,521,064</u>	<u>15,175,180</u>	<u>1,233,984,556</u>
Financial liabilities					
Insurance contract liabilities (Note 10)	231,462,811	1,788,920	-	509,557,358	742,809,089
Accounts payable (excluding rent received in advance and premium received in advance) (Notes 20 and 20.1)	82,514,588	-	-	-	82,514,588
Insurance liabilities (Note 21)	74,436,991	-	-	-	74,436,991
	<u>388,414,390</u>	<u>1,788,920</u>	<u>-</u>	<u>509,557,358</u>	<u>899,760,668</u>

The Company's exposure to interest rate risk relates to its bank deposits and debt instruments. At 31 December 2021, deposits carried interest at the range of 0.45% to 5.25% per annum (2020: 0.93% to 5.25% per annum). At 31 December 2021, debt instruments carried interest at the range of 4.75% to 7.50% per annum (2020: 4.75% to 7.50% per annum)

If interest rates had been 50 basis points higher/lower throughout the year and all other variables were held constant, the Company's profit for the year ended 31 December 2021 and equity as at 31 December 2021 would increase/decrease by approximately AED 4,027,515 (2020: AED 4,462,764). The Company's sensitivity to interest rates has not changed significantly from the prior year.

34.9 Equity price risk

34.9.1 Sensitivity analysis

At the end of the reporting period, if the equity prices are 10% higher/lower as per the assumptions mentioned below and all the other variables were held constant, the Company's:

- Other comprehensive income and equity would have increased/decreased by AED 688,834 (2020: AED 517,517).

Notes to the financial statements
For the year ended 31 December 2021 (continued)

34. Financial instruments (continued)

34.9 Equity price risk (continued)

34.9.2 Method and assumptions for sensitivity analysis

- The sensitivity analysis has been done based on the exposure to equity price risk at the reporting date.
- At the end of the reporting period, if equity prices are 10% higher/lower on the market value uniformly for all equities while all other variables are held constant, the impact on profit or loss and equity has been shown above.

A 10% change in equity prices has been used to give a realistic assessment as a plausible event. Company does not have any impact on profit or loss due to sensitivity of equity prices.

35. Dividend

At the Annual General Meeting held on 12 April 2021, the Shareholders approved a cash dividend of AED 30 million at AED 30 per share for 2020 (2020: AED 30 million at AED 30 per share for 2019).

The Board of Directors propose that a dividend of AED 30 per share amounting to AED 30 million be paid to shareholders for 2021 which is subject to approval by the shareholders at the Annual General Meeting and have not been included as a liability in these financial statements.

36. Approval of the financial statements

The financial statements were approved by the Board of Directors and authorized for issue on 8 March 2022.

Corporate Governance Report 2021

Alliance Insurance Company PSC

Corporate Governance Report 2021

1. A statement of the procedures taken to complete the Corporate Governance system during 2021, and how are they applied.

Alliance Insurance Co. (PSC) gives utmost priority to the practices of executing the governance controls and the Institutional Discipline Standards as a result of its compliance with the Chairman of Securities and Commodities Authority resolution No. (3/ر.م)/ 2020 concerning the corporate Discipline Standards and the governance of Public Shareholding Companies.

Alliance places strong attention to disclosure principles and transparency for the practices of corporate governance controls. The following is a brief of activities and practices adopted by Alliance insurance Company:

- a) Monitor the internal control system in the company through audit committee and the internal audit department ensuring internal control functions are implemented properly for all departments in the company.
- b) Timely disclosure of its quarterly financial results, decisions taken at the Board of Directors or General Assembly meetings through Securities and Commodities Authority (SCA) and Dubai Financial Market (DFM).
- c) The Board of Directors, Senior Management of the Company and its executive departments continue to work in accordance with prudent underwriting principle and guidelines, as well as the adoption of conservative investment guidelines in order to protect the rights of its shareholders and clients.
- d) The investment committee ensures the implantation of investment guidelines, review of investments performance and takes necessary investment decisions to diversify its portfolios and improve returns.

ABOUT THIS REPORT (GRI 102-1, GRI 102-45, GRI 102-46, GRI 102-48, GRI 102-49, GRI 102-50, GRI 102-51, GRI 102-52, GRI 102-53, GRI 102-54, GRI 102-56, G8, G9, G10)

This is the second Sustainability Report issued by Alliance Insurance P.S.C. following its inaugural report for the year 2020.

This report covers the period between January 1, and December 31 2021, unless stated otherwise.

The report discloses the Company's performance related to economic as well as environmental, social, governance (ESG) factors for the year 2021. The report can be read in conjunction with the company's 2021 Consolidated Financial Statements and Corporate Governance Report to obtain a comprehensive and complete overview of the Company.

REPORTING SCOPE

Alliance Insurance P.S.C. is a public shareholding Company established in Dubai on July 1, 1975 as a limited liability company under the name of Credit and Commerce Insurance Company. The Company was converted to a Public Shareholding Company in January 1995 in accordance with the UAE Federal Commercial Companies Law No. (8) of 1984 (as amended), after having been reincorporated in Dubai, under an Emiri Decree, on January 6, 1982 as a limited liability company. Alliance Insurance P.S.C. was listed on the Dubai Financial Market on July 4, 2005.

Alliance Insurance P.S.C. is headquartered in Warba Centre, Abu Baker Al Siddique Road, 2nd Floor, Dubai - United Arab Emirates.

In addition to its headquarters, Alliance operates five branches throughout the UAE, including two other branches in Dubai (Warba Centre and Jebel Ali), two in Abu Dhabi (Abu Dhabi City and Al Ain), and one in Sharjah. All branches fall within the scope of this report. The Company does not have any subsidiaries, and unless otherwise stated, we take operational control as the boundary for reporting.

BASIS OF PREPARATION

This report has been prepared in accordance with the GRI Standards (GRI): Core option, as well as with the Dubai Financial Market's (DFM) ESG metrics. In addition, the report outlines Alliance Insurance P.S.C.'s alignment with the Sustainable Development Goals as well as the UAE Centennial Plan 2071.

The GRI Content Index at the end of the report also includes our alignment with the DFM ESG disclosures.

EXTERNAL ASSURANCE

The content of this report has been reviewed and validated by the Company's internal audit function.

On the other hand, all financial figures extracted from any of our financial statements have been independently audited by internationally recognised audit firms.

FORWARD-LOOKING STATEMENTS

Forward-looking statements involve uncertainty given the many external factors that could impact the environment in which the Company operates.

The Company holds no obligation to publicly update or revise its forward-looking statements throughout the coming fiscal year except as required by applicable laws and regulations. It is, therefore, not within the scope of our internal audit team to form an opinion on these forward-looking statements.

A WORD FROM OUR CEO (GRI 102-14)

While the world bounced back in 2021 from the worst effects of the COVID-19 pandemic, the global economy continued to see significant disruptions.

Amidst the many challenges this unprecedented situation poses, governments and businesses have found innovative ways to maintain their operations and allow people to go about their daily lives.

Practices that seemed almost unthinkable just a couple of years ago have already become second nature to many of us. Virtual business meetings became the norm rather than the exception. Remote learning is now a reality for students worldwide, thanks to e-learning platforms. Moreover, we have witnessed the rise of telemedicine, allowing the delivery of health-related services through online platforms.

The pandemic proved that humanity possesses a remarkable resilience to adapt and innovate in the face of significant challenges by turning obstacles into an advantage. As a result, we see the rapid adoption of digital technologies across most business sectors, accelerating a transition that began long before the pandemic.

Alliance Insurance has also used this challenge as an opportunity to improve its services, make them more accessible, and introduce innovative new products. Most recently, in partnership with one of the largest reinsurers in the world, Alliance was the first to bring a COVID-19 travel insurance coverage to the UAE market through our online services.

We fully intend to maintain the momentum of our digitalization journey by fast-tracking our online offering and developing new applications to streamline services. Innovation has been at the forefront of our business strategy. We will continue introducing innovative new products that provide our clients with solutions that meet their needs. Digital transformation supports easier access and efficient delivery of services and helps address the world's biggest challenges. Climate change impacts insurance companies on both sides of the balance sheet through technical underwriting and investment activities. The insurance industry must manage such risk from a physical and transitional perspective.

The UAE pledged to become a net-zero carbon economy by 2050. Led by the Ministry of Climate Change and Environment, all government stakeholders updating their strategic plans to support this transition. However, government efforts will ultimately cascade down through legislative decrees to the private sector to reduce the dangerous impact on global climate. Therefore, companies must align their strategies and practices with the net-zero commitment to maintain a competitive edge and do their share in combating climate change.

It is not too late to avoid the worst impacts of climate change and reduce associated risks. But to do so, every organization must play its part and take urgent steps to embed climate action into their business strategies. As we continue integrating material ESG factors into our business model and enhancing our sustainability reporting, we are committed to doing our part by reducing our environmental impact and to ensure a better tomorrow for future generations.

Executive Board Member & CEO

WHO WE ARE (GRI 102-2, GRI 102-3, GRI 102-4, GRI 102-5, GRI 102-6, GRI 102-7, GRI 102-12, GRI 102-13, GRI 102-16, GRI 102-18)

OUR PROFILE & BUSINESS PILLARS

Alliance Insurance P.S.C. (Alliance) has been a leader in the UAE insurance market for more than 46 years. We are proud to be the insurance partner of choice for many corporate and individual customers. We have nurtured long-standing relationships with our clients, working hard to earn their trust by consistently delivering outstanding levels of customer service. Our talented team of professionals offers expert advice and innovative, tailor-made risk-management solutions to meet all customer needs.

Our successful track record and steady financial performance throughout our many years of operation has allowed us to build strategic partnerships with some of the largest and most reputable reinsurers in the world. We strive to strengthen and grow these relationships to consolidate our market position and offering, for the benefit of our clients.

Our brand reputation is synonymous with stability, reliability, and credibility.

OUR OPERATIONS

Alliance offers products covering three main service lines: Life Insurance, Health Insurance, and General Insurance.

We offer both individual and group insurance under the Life and Health service lines, while under General Insurance we cover medical, fire, motor, marine and other specialized insurance solutions.

We have invested significantly in developing our online capabilities. Clients can request a quotation, purchase a policy, and submit documentation for certain products through our website. Our full spectrum of solutions will be available via the website in the near future.

Headquartered in Dubai, Alliance operates six branches throughout the UAE, including two additional branches in Dubai (Warba Centre and Jebel Ali), two in Abu Dhabi (Abu Dhabi City and Al Ain), and one in Sharjah.

OUR OPERATIONAL PILLARS

OUR GOVERNANCE & OWNERSHIP STRUCTURE

GOVERNANCE STRUCTURE

Our reputation for stability, reliability, and credibility is reinforced by a robust corporate governance framework. Guided by our core values of Honesty, Fairness, and Transparency, our rigorous adherence to best governance practices protects our stakeholders' interests while also supporting our efforts to create sustainable value for them over time.

As part of our governance structure, corporate reporting provides an important layer of transparency for our stakeholders. Taken together, our annual audited financial statements, corporate governance report, as well as our ESG report, disclose comprehensive financial as well as non-financial information that demonstrates how we create value for stakeholders.

Our Board of Directors ("Board"), supported by various committees, is responsible for overseeing governance and ensuring that robust internal control systems are in place.

The Audit Committee, through the internal audit function, is responsible for ensuring that the highest levels of compliance, risk management, and business ethics are maintained at the operational level.

The Investment Committee, implements, monitors and reviews an efficient asset allocation strategy to ensure investment diversification and the generation of consistent income.

The Nomination and Remuneration Committee is entrusted to manage all Board level and executive management level nomination and remuneration related decisions while ensuring the independence of the Board and its committees.

The Insider’s Trading Follow-up and Supervision Committee is in charge of monitoring all securities related transactions by members of the Board, committee members, and management, as well as safeguarding material non-public information.

The Board of Directors is composed of nine highly reputable members with successful track records in leading large organizations.

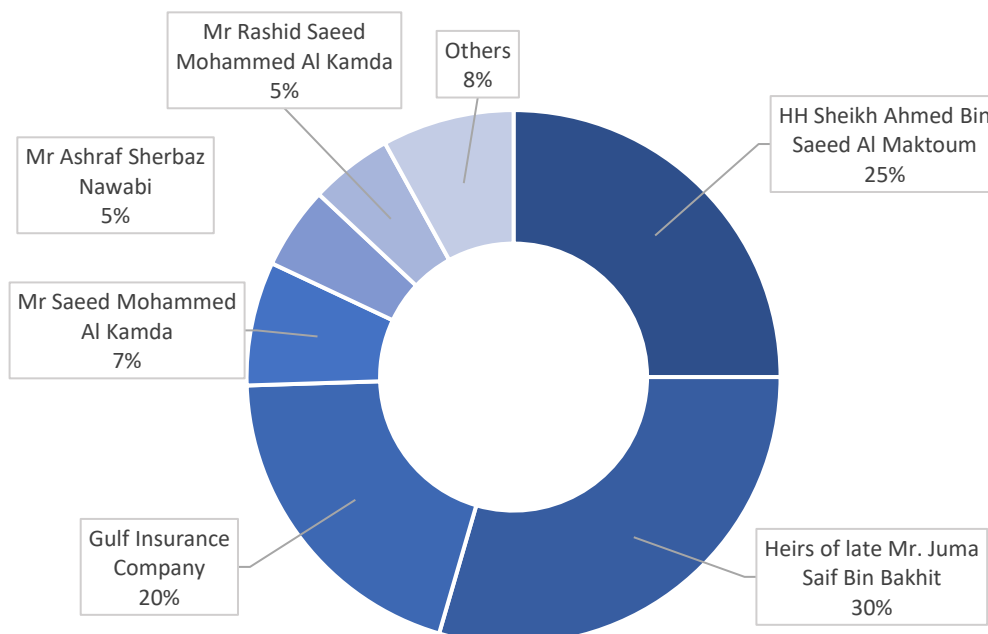

- 8 members are non-executive
- 7 members (forming a greater majority) are independent

The Audit and the Nomination & Remuneration Committee’s members are all independent and non-executive.

OWNERSHIP STRUCTURE

Alliance Insurance has six major shareholders owning a combined 92% of the company:

Shareholder Structure

OUR MISSION

To continue to move ahead by leading through a customer-centric approach and offer innovative insurance solutions with professionalism and competency.

OUR VISION

To be among the leading preferred insurers in the UAE across all lines known for the highest level of quality service and reliability.

OUR VALUES

Alliance places the values of Honesty, Fairness and Transparency at the heart of its customer-centric business model, applying these principles across all our operations.

CREDIT RATING

In October 2021, AM Best affirmed the Financial Strength Rating of A- (Excellent) and the Long-Term Issuer Credit Rating of "a-" (Excellent) of Alliance with a stable outlook. AM Best said the ratings reflect Alliance's "very strong" balance sheet, as well as its strong operating performance, limited business profile and appropriate enterprise risk management.

SUPPORT FOR THE UAE CENTENNIAL PLAN & THE SDGs

The UAE Centennial Plan 2071 outlines the country's strategic direction for the next 50 years. The major goals and objectives of the plan, launched in 2017, are designed to lay the foundations for the success and prosperity of future generations. As such, the plan is very much focused on securing the long-term sustainability of the country.

Under the Plan, the UAE will invest in its youth and work towards making the UAE the best country in the world by 2071, when the nation will celebrate its centenary.

The Centennial Plan 2071 has four strategic pillars:

- *Future-focused government*: Aims to position the UAE's government as the best in the world and achieve happiness in society
- *Excellent education*: Highlights the importance of quality education for the country's development. Areas of focus include advanced science and technology, IT, space science, engineering, innovation, and health sciences
- *A diversified knowledge economy*: Focuses on increasing the productivity of the national economy, supporting national companies, focusing on innovation and entrepreneurship, among others
- *A happy and cohesive society*: To establish a secure, tolerant, cohesive and ethical society

THE SUSTAINABLE DEVELOPMENT GOALS (SDGS)

The 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals (SDGs) were adopted by 193 member states of the United Nations in 2015 as a universal call to action to end poverty, protect the planet, and ensure peace and prosperity for all people, leaving no one behind.

The UAE has enthusiastically embraced the SDGs and began the process of integrating them in January 2017 with the formation of the National Committee on the SDGs. The National Committee mapped all 17 SDGs to a pillar of the UAE National Agenda which was developed in 2014 to guide and deliver the UAE Vision 2021, since superseded by the UAE Centennial Plan 2071. As a UAE established company that serves locally-based individuals and corporations, Alliance is aligned with major government initiatives including the UAE Centennial Plan 2071 which integrates the SDGs.

The insurance sector plays a role in building more resilient communities by providing risk management and mitigation solutions to individuals as well as companies of all sizes. This is particularly crucial for the lower income members of our society and for small and medium-sized enterprises (SMEs) as without

coverage they would be particularly vulnerable in the event of poor health, damage to property, or loss of employment, all of which are more likely in times of crisis.

Last year, we mapped our business model to those specific SDGs that we identified as being material to our business and where we can make the most impact. We then did the same for the UAE Vision 2021 the results of which showed a clear alignment with five SDGs, as shown below:

SDG 3 represents our main impact and priority SDG

Alliance also identified **SDGs 1, 5, 8, and 13** as goals that our company can contribute to directly through our activities.

For 2021, we have highlighted how each of the sections of this report are aligned with the SDGs as well as with the UAE Centennial Plan 2071, as shown in the table below. This allows for a comprehensive coverage of how we impact each SDG while the GRI disclosures serve as Key Performance Indicators (KPIs).

The Section	The SDG	UAE Centennial Plan
Our customers	SDG 3 SDG 1 SDG 5	<ul style="list-style-type: none"> A happy and cohesive society A diversified knowledge economy
Our Contribution to Society	SDG 3 SDG 1 SDG 5 SDG 8 SDG 13	<ul style="list-style-type: none"> Excellent education A diversified knowledge economy A happy and cohesive society
Our Environmental footprint	SDG 13	<ul style="list-style-type: none"> A diversified knowledge economy A happy and cohesive society
Financial Stability Backed by Strong Governance	SDG 8	<ul style="list-style-type: none"> A diversified knowledge economy

OUR APPROACH TO ESG (GRI 102-20, GRI 102-40, GRI 102-42, GRI 102-43, GRI 102-44, GRI 102-47, E8, E9, G3)

ESG AT ALLIANCE INSURANCE

Consideration of Environmental, Social, Governance (ESG) factors is an integral part of our organization’s strategy and business model.

All stakeholders, including investors, customers, employees, and suppliers, among others, are increasingly taking note of a company’s performance on ESG factors when deciding whether to engage with them.

It is therefore critical that companies manage the risks and opportunities associated with ESG if they are to remain competitive and create sustainable long-term value.

ESG integration calls for organizations to be responsible employers, responsible citizens and, in the case of financial institutions, responsible investors.

Achieving this means constantly engaging with relevant stakeholders to take account of their interests and wellbeing and ensure that value is created for all.

Alliance Insurance’s ESG Approach

ESG IN OUR INSURANCE SOLUTIONS

Alliance has begun the process of embedding ESG risk considerations into our business model. For an insurance company, this is particularly relevant as it pertains to property & casualty insurance solutions, as these operations are more likely to be impacted by issues such as climate change in future. Climate change is leading to rising sea levels, which threaten coastal areas, and ever greater prevalence of extreme weather incidents which can cause serious damage to property and livelihoods. Asset owners will need to protect themselves against these growing threats. Accordingly, we will be looking at introducing solutions that incentivize our clients to adopt sustainable practices.

ESG IN OUR BUSINESS PRACTICES

Having a robust governance structure and conducting business ethically are key components of ESG integration. Alliance has a robust governance system in place, with an effective internal control system and stringent compliance processes that are designed to safeguard our reputation. As an insurance company, it is vital that we respect our clients' privacy and manage their data in a responsible way. We have the technology and the mechanisms in place to ensure that their data is safe and secure at all times, and only accessed by those that are authorised.

ESG IN OUR INVESTMENTS

Be it in relation to our real estate holdings or our fixed income investments, we will allocate a greater portion of our capital to finance sustainable development, which will ensure that our capital is preserved and that we are able to generate future income. As such, we will create the necessary framework to guide our future investment decisions through an ESG lens.

RESPONSIBLE EMPLOYER

Employees perform to the best of their abilities when they are part of an organization that treats them with dignity and respect and looks after their health and wellbeing. Being a responsible employer means offering reasonable working hours and conditions, providing fair pay, equal treatment for all employees, and a diverse and inclusive working environment.

Alliance is committed to fostering a positive workplace culture because it allows us to attract and retain the best talent. We offer employees a platform to unleash their creativity so they can thrive and innovate. And we support career progression by providing opportunities for training and development, so they can achieve their potential and their aspirations.

RESPONSIBLE CITIZEN

Being a responsible citizen means being conscious of our impact on the environment and ensuring we gradually shift towards more sustainable business practices. This includes having a plan to reduce the amount of waste we produce, cut back on our energy consumption, and reduce our greenhouse gas emissions. We must also play an active and positive role in our society and contribute to its prosperity. We can promote community wellbeing by participating in events, volunteering, and making charitable donations.

OUR KEY MATERIAL TOPICS

Stakeholder inclusiveness and engagement has become an integral part of a company's ability to generate value over the long-term. Through continuous engagement with our stakeholders, we can form a deeper understanding of the issues that matter to them and that are therefore material to our business. The outcome of this exercise provides us with the information we require to integrate stakeholder needs into our business practices.

We will look to conduct a thorough stakeholder engagement exercise so as to enhance our understanding of all material issues that need to be managed. The outcome of this process will be revealed in our 2022 sustainability report.

For the purposes of this report, we have followed a similar approach to last year and have made use of our existing engagement methods with internal and external stakeholders.

When mapping various topics, we have selected those that we understand to be key priorities, based on the engagement process, our knowledge of our industry, and best practices.

Below is the list of our key stakeholders, inclusive of the existing methods of engagement and the corresponding material topics.

STAKEHOLDER LIST AND CURRENT ENGAGEMENT METHODS

KEY STAKEHOLDER GROUPS	EXISTING METHODS OF ENGAGEMENT AND FREQUENCY	CORRESPONDING MATERIAL TOPICS
CUSTOMERS	<ul style="list-style-type: none"> • Various touch points throughout the onboarding and servicing process • Social media • Company announcements • Website • Central Bank complaint portal • Marketing material and advertising • Online customer reviews 	<ul style="list-style-type: none"> • Data Protection • Customer privacy • Product & service information labelling • Digitalization

- A diversified knowledge economy

CUSTOMER SATISFACTION

Alliance seeks to deliver a superior experience for customers and provide them with the best possible solutions to meet their needs. As such, customer feedback serves as an important barometer for assessing and enhancing our performance.

Our talented sales team, comprising of 50 individuals, is the first point of contact with our customers. We hire the best available candidates and provide them with the training they need to offer outstanding service. It is critical that our sales team are equipped with a deep knowledge and understanding of the products they sell and can effectively communicate the terms of the policies to customers in a way that is easy to understand, thus enabling them to make well informed decisions.

Alliance goes beyond selling typical insurance products. We try to introduce innovative solutions that the market is not yet catering to. This is an important differentiating factor for our organization and one that customers and brokers alike value highly. These solutions can help our customers to solve specific challenges and protect their personal and business interests from many risks.

We ensure that our customers' wellbeing is always catered for. For instance, when it comes to medical insurance, we make sure that our hospital networks include some of the best healthcare providers. As for motor insurance, we select the best garages in the UAE to ensure our customers' satisfaction.

Most importantly, we are backed by some of the largest and most reputable global reinsurers, making us a highly credible insurance provider that always delivers on promises.

DIGITAL TRANSFORMATION

Digitalizing our operation is a top priority and an ongoing process. It allows us to streamline our customer service, and enables clients to access information about their policies, renew them, or request quotations remotely.

Our IT department's main priority is to ensure a seamless experience for our customers. More specifically:

- The IT department supports the migration of all services onto the online portal and eventually onto a dedicated mobile app. There is also an

important initiative underway that will allow all internal documents to be digitally signed, speeding up processes and providing a quicker turnaround time for our customers

- The IT department also ensures the security of all the customer data, which is discussed in more detail in the next section

Some of the achieved milestones include:

- We have enabled policies to be issued online, particularly in relation to motor, home, travel, and health insurance.
- Customers can now get quotations, and purchase policies, in relation to the above segments, online.

While customers can make all payments via our e-platform, the next phase of development will allow them to submit claims online.

For convenience, we have ensured that our online portal is mobile friendly. In addition, we are in the process of developing a dedicated mobile application.

DATA PROTECTION & CUSTOMER PRIVACY

We have a responsibility to protect our customers' data and ensure that it cannot be accessed, shared, or utilized without their expressed permission. This is our highest priority. Customers trust us to handle their private and confidential information, including health related information, and any breach of this trust would present a clear risk to our reputation.

To that end, Alliance is fully aligned with local regulations regarding the protection of data. These include the National Electronic Security Authority's (NESA), a government body tasked with protecting the UAE's critical information infrastructure and improving national cyber security.

As at December 31, 2021 we were in full compliance with NESA regulations while we are awaiting audit by Abu Dhabi Health Information and Cyber Security (ADHICS). Compliance with ADHICS is mandatory for any company operating in Abu Dhabi with access to patient healthcare information.

In addition, as part of the initiatives implemented by the IT department in 2021 to strengthen its data security system, we are updating all related policies and procedures. We now have 30 different policies in place as part of our general Information Security Management Policy, including but not limited to the following:

- Information Security Awareness & Training Policy
- Acceptable Use Policy
- Access Control Policy
- Clear Desk and Clear Screen Policy
- Data Protection & Privacy Policy
- Communications Security Policy

We have a robust data control system to ensure that customer data is only used by those that are authorised. This is done by ensuring that all internal roles are clearly segregated through the system, and that there is a clear authority matrix.

We also have the necessary IT systems in place to safeguard against the risk of cybersecurity threats. Data hosted on the company's servers have double protection. They are protected physically by means of a disaster recovery site, but also by having multiple firewalls and backups. This will be replaced by a secure cloud system (hosted in the UAE) which is being procured from a reputable supplier with a proven track record.

Our customer-related data and KPIs:

	2021	2020	2019

SDG

UAE Centennial Plan

- Excellent education
- A diversified knowledge economy
- A happy and cohesive society

Organizations can contribute to society’s well-being and prosperity in a number of different ways. First and foremost, we do this through our workforce by providing them with career opportunities which enable them to support their families and safeguard their futures. Providing training and development and opportunities for career advancement are an essential part of helping employees to grow within the organization and achieve their aspirations.

We can also support the development of society by enforcing ethical employment practices and ensuring our workforce is diverse and inclusive. Furthermore, we can support our local communities through philanthropic activities and participating in events.

Alliance firmly believes that these business practices not only contribute to our society but create a happier and healthier work environment, which ultimately lays the foundations for a more productive and dynamic organization.

A COLLABORATIVE & PROSPEROUS WORKPLACE

Alliance places great emphasis on creating a culture where employees are treated with dignity and respect, and where they can feel a sense of belonging. A collaborative work environment is one that is conducive to teamwork, innovation, and creativity. By fostering a culture of ownership, organizations empower their employees to go the extra mile and contribute to the growth of the business. Employees are only prepared to do this if they know their efforts will be acknowledged and rewarded with opportunities to progress.

In 2021, we strengthened our HR practices with the introduction of a new Code of Ethics and Conduct, in addition to the Employee Handbook which was already in place. We also have in place a whistle-blower policy as an important additional layer of security for our employees.

EQUAL OPPORTUNITY

Alliance is an equal opportunity employer and we are very keen to promote greater opportunities for women in the workplace. As of the end of 2021, 64 of our employees were female, all on full-time contracts, representing around a third (32%) of our workforce. We have seen a steady growth in female representation at the company in recent years, up from 28% in 2018. Currently, 23% of our senior level positions are filled by female employees while the majority of women (45%) are in mid-level positions.

We have a zero-tolerance policy towards discrimination or harassment in the company and encourage our employees to report any instances of these to management, without fear of reprisal.

DIVERSITY & INCLUSION

Having a diverse and inclusive workforce undoubtedly contributes to a happier and healthier society. However, there is a growing body of research that argues the strong business case for greater levels of diversity and inclusion in the workplace. In other words, not only is it the ethical thing to do, it can also lead to positive business outcomes, such as fostering greater levels of innovation among employees and ultimately lead to improved financial performance for the company.

Alliance values the diversity of its workforce which covers 21 nationalities and multiple religions, ethnicities, cultures and languages. In addition, many of our people have spent more than 10 years at the company and this level of employee retention is a very positive indicator of employee satisfaction, which ultimately translates into quality customer service and improved overall business performance. We believe this is down to the fact that we have successfully created a family-oriented work environment that gives employees a sense of belonging, creates a sense of security, and encourages them to remain at the company for the long-term.

TRAINING & DEVELOPMENT

An employee that feels they can fulfil their aspirations at an organization is more likely to stay. This is why we support our workers with opportunities to continually build their skills and capacities through training and development. Moreover, continuous learning supports business productivity and boosts competitiveness.

In 2021, training at Alliance primarily focused on Anti-Money Laundering (AML). This has been a focus for the Central Bank of the UAE which has been encouraging all insurance companies to strengthen their AML internal controls. Moreover, Life Insurance is more prone to AML risks than other business lines, and given the importance of this business segment to Alliance, we must be particularly vigilant when it comes to AML. It is vital that we remain up-to-date with the latest regulations and maintain a robust internal control system to ensure compliance.

In addition to the above, we have developed a rigorous internal training programme for our sales representatives, to ensure they are equipped with detailed knowledge of the products they sell. This allows them to provide the highest levels of customer service and helps to protect the company's reputation. This training begins in the office before moving to the field where sales representatives progressively increase their interaction with clients. A unit manager accompanies them throughout the first two weeks of their field journey, or until they are confident enough to manage on their own.

APPRAISAL SYSTEM

We continuously monitor employee performance to ensure they are meeting the standards we have set for them. Through a fair and transparent evaluation process, all employees are appraised once a year, starting at the department level. This is a two-way process, whereby the employee and their line manager both fill out the appraisal forms, giving employees the opportunity to assess their own performance. The line manager completes the evaluation, detailing areas for improvement, setting goals for the next year, and recommending further training and development if needed. Employee and manager must both sign off on the final evaluation before it is submitted to the HR department.

SUPPORTING OUR COMMUNITY

The COVID-19 pandemic has not only had a negative impact on public health but has exacerbated many social problems. For example, poorer sections of society have been adversely affected as many were unable to work from home during lockdowns and this has increased social inequalities.

We are fortunate that the UAE has been able to manage the impact of COVID-19 more effectively than many other countries. Nevertheless, the pandemic has intensified our responsibility towards the community. Contributing to important causes and encouraging our employees to volunteer has helped create a positive spirit among the workforce at Alliance.

In 2021, Alliance supported various charitable organizations and associations including:

Beit Al Khair Society	
	Al Noor Centre For the Care of Disabled
Khorfakkan Club for the Disabled	
	Rashid Centre for Disabled
Emirates Association of the Visually Impaired	

EMIRATIZATION

Alliance is a Silver member of the Tawteen Partners Club, a national Emiratization initiative by the UAE Ministry of Human Resources and Emiratization (MOHRE) to encourage locals to take up more jobs in the private sector. The UAE has made Emiratization a clear priority and in 2021 the government said it would spend \$6.5 billion to achieve its goals.

Alliance supports this initiative which helps build local capacities and is essential for the future development of the UAE. All corporations must play their part and give local talent the opportunity to develop and prosper within the private sector. This can ultimately increase a company's competitiveness as well as increase its contribution to society.

Our Emiratization rate increased to 6% in 2021 from 4% in 2019, inclusive of our sales staff. Eight of our 11 Emirati employees (73%) are female.

Our Emiratization related data and KPIs:

	Emiratization Rate
2019	4%

- A diversified knowledge economy

OUR ENERGY USAGE AND CORRESPONDING GHG EMISSIONS

In November 2021, the UN Climate Change Conference of the Parties (COP26) in Glasgow convened government representatives from almost 200 countries, along with private sector and civil society stakeholders to accelerate action towards the goals of the Paris Agreement and the UN Framework Convention on Climate Change. The principle aim of the gathering was to keep alive the hope of limiting the rise in global temperature to 1.5 degrees Celsius above pre-industrial levels, as per the Paris Agreement, through measures covering mitigation, adaptation, finance, and collaboration.

As part of the Glasgow Pact, countries including the UAE agreed to return next year with stronger 2030 emissions reduction targets to limit global heating to 1.5 degrees. In addition, the conference also resulted in commitments to curb methane emissions, to halt and reverse deforestation, and align the finance sector with net-zero emissions by 2050, among others. Private sector companies will need to play an important role in achieving these aims by forming cross-sectoral partnerships that can help reshape the global economy at the scale needed to deliver a net-zero future.

The Insurance sector will also need to play an important role in the decarbonization of the global economy through engaging with their clients and investees on their climate transition plans. To that end, the Net-Zero Insurance Alliance, a UN-convened initiative that many of the world's largest insurance companies have joined, is ensuring that the sector plays an increasingly important role as risk managers, insurers and investors to support the transition to net-zero.

UAE COMMITS TO NET ZERO BY 2050

In the lead up to COP26, the UAE joined the ranks of countries pledging to reach net-zero by 2050, the first country from the MENA region to do so. This commitment will bring major economic opportunities and support the vision of the UAE Centennial Plan 2071 to develop the Emirates into the most dynamic economy in the world.

The UAE Ministry of Climate Change and Environment (MOCCA) will coordinate efforts to deliver the Net Zero by 2050 strategy and ensure collaboration at the national level to fulfil this objective. Stakeholders across key sectors, such as energy, economy, industry, infrastructure, transport, waste, agriculture, and the

environment, will align their respective strategies to achieve the target. Federal and local government authorities will develop plans to reduce emissions while also ensuring economic growth based on principles of sustainability.

As a result of these efforts, it is reasonable to anticipate that the UAE will introduce laws and regulations to align the private sector with the objectives of the Net Zero by 2050 strategy. This poses an increasing regulatory risk which will impact all UAE corporations and it is therefore imperative to take early action.

Our action will revolve around the following three segments:

OUR OPERATION	Decreasing all the amount of Greenhouse gases being emitted through our operation which is primarily related to our offices, along with our travel
OUR BUILDINGS	<ol style="list-style-type: none"> 1. Doing a gradual refurbishment plan with environmental friendly material 2. creating awareness and engaging with our tenants to ensure they are in line with our climate change plans
OUR INVESTMENTS	Engaging with our investee companies to ensure they embed ESG into their business models and maintain their investment grade rating

Below are our energy usage data and corresponding GHG emissions:

<i>Energy Consumption (GJ)</i>		2019	2020	2021
Energy Consumption	Fuel Consumption (Petrol)	162.67	120.15	111.01
	Electricity Consumption	747.80	650.81	914.45
Total Fuel Consumption		162.67	120.15	111.01

SDG

UAE Centennial Plan

- A diversified knowledge economy

ECONOMIC IMPACT AND BUSINESS OUTLOOK

The Alliance Insurance brand is synonymous with stability. Over the years this stability has enabled us to consistently create value for all our stakeholders including customers, employees, and society.

As a testament to this stability, in 2021 credit ratings agency AM Best affirmed its Financial Strength Rating of a- (Excellent) and the Long-term Issuer Credit Rating of "A-" (Excellent) with a stable outlook. This rating has remained unchanged since 2006.

AM Best said the ratings reflect Alliance's very strong balance sheet, as well as its strong operating performance, limited business profile and appropriate enterprise risk management.

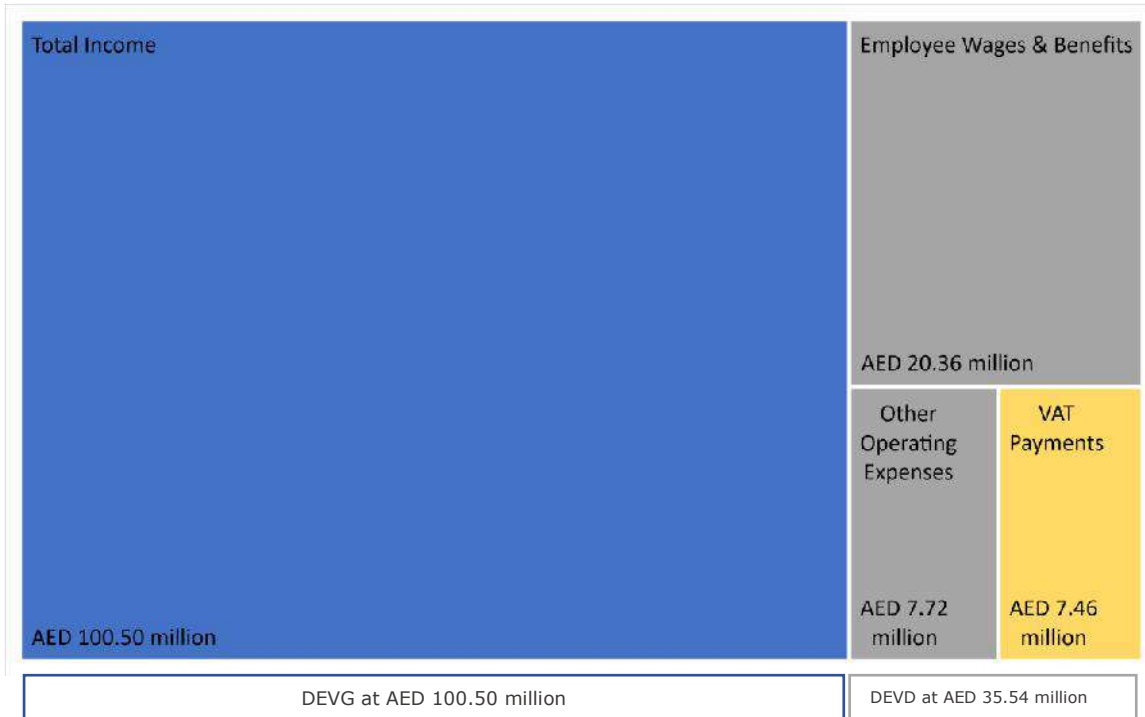

This stability has enabled Alliance to:

- Build long-term working relationships with the world's largest reinsurers.
- Deliver on our promise to provide clients with the resilience and protection they need and expect.
- Provide our employees and society with value in the form of salaries, benefits, and community related contributions.
- Deliver shareholder value through the growth of their equity and the distribution of dividends.
- Finally, we also create value for the government treasury through VAT payments.

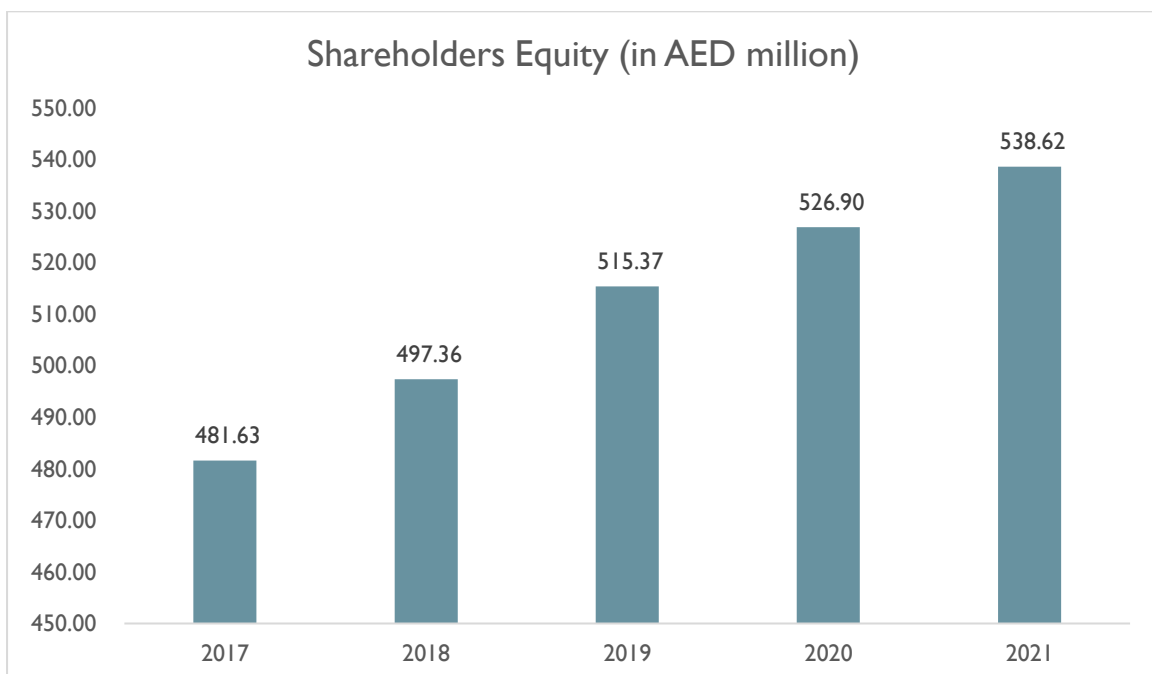

This year we have disclosed our Direct Economic Value Generated and Distributed, as per the GRI Standards. This disclosure is an indication of our organization's ability to create financial value for our stakeholders.

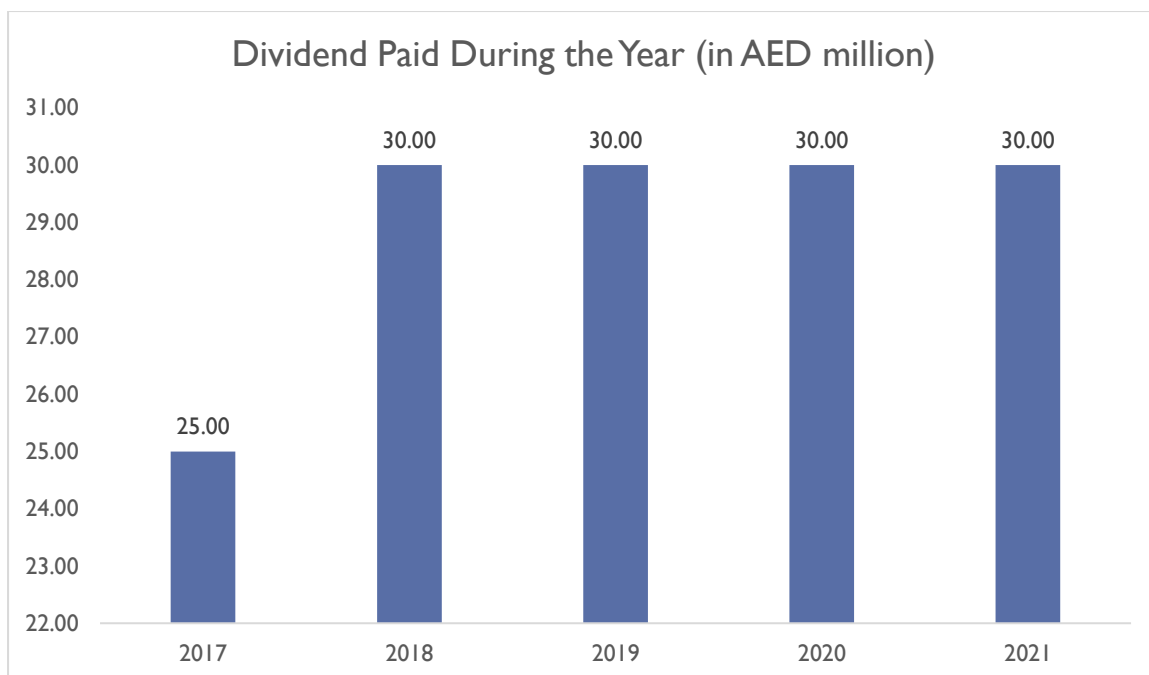

The chart below includes the following:

- The Direct Economic Value Generated (DEVG), which is equivalent to total Income: AED 100.50 million
- Direct Economic Value Distributed (DEVD) which is composed of operating costs, employee wages and benefits, payments to providers of capital, payments to government and community investments: AED 35.54 million.

The chart below shows the steady increase in shareholders' equity and our stable dividend distribution over the past five years:

COMMITMENT TO INNOVATION

As part of our strategic priority to be an innovative insurance company and to always strive to introduce new solutions to the market, in 2020 we were the first insurance company in the UAE to provide inbound travel insurance covering COVID-19. The policy covered COVID-19 medical emergencies in addition to accommodation expenses and provided a 24-hour emergency medical assistance and claims service. This product was introduced in partnership with one of the largest global reinsurance providers and contributed around 23% of our General Insurance gross premium in 2021.

BUSINESS OUTLOOK

In 2021 our revenue segmentation was equally balanced between our Life and General Insurance business lines. We intend to maintain a balanced premium portfolio that allows for diverse income streams.

We are committed to providing our customers with high quality products backed by the largest reinsurers in the world and will constantly assess potential opportunities to introduce innovative new solutions to the market.

COMPLIANCE AND RISK MANAGEMENT GOVERNANCE

Our credibility and reputation in the market have been built over many years by a track record of consistently delivering impeccable professional service. Thanks to this we have earned the trust of our clients, business partners, and all our stakeholders. Safeguarding this reputation is our top priority. Alliance ensures that all our operations are conducted according to the highest levels of ethical business practices as well as strict compliance with applicable laws and regulations.

COMPLIANCE FUNCTION

Our employees are made aware of their responsibilities from the day they join the company and they must acknowledge having read and understood the Code of Ethics and Conduct (Code). To ensure that adequate processes are always in place, we regularly review and update the Code and have also recently updated the Employee Handbook.

In addition to the Code, the compliance department ensures that all practices and policies are aligned with the Central Bank's requirements. The internal audit team, which functions independently and reports directly to the Board, serves as an additional layer of risk management to ensure compliance with all applicable laws and regulations.

The compliance department conducts quarterly reviews to check that policies are updated and that all departments are in compliance. In addition, the department also ensures that client files are fully up to date and include all documentation required by the regulator.

Alliance has strict controls in place to guard against fraud by our employees, and the company did not record any incidents in 2021. Our Employee Handbook serves as a guide to the various rules and regulations in place to create a workplace founded on strong ethics. The handbook outlines policies and procedures in relation to various important topics such as Conflict of Interest, Proprietary Rights, Code of Conduct and Business Ethics, and Disciplinary Procedures, among others.

ANTI-MONEY LAUNDERING FUNCTION

Alliance is fully committed to the highest standards of Anti-Money Laundering (AML) practices and combating the financing of terrorist activities. The AML department serves a vital function, ensuring that no entity abuses the company's services to launder money, which would represent a significant risk to our business. It is critical that we have strong policies and processes in place to ward against this potential threat. Our employees are required to read all AML related policies and to adhere to them. To this end, they receive significant training in this area, as mentioned in section 7.

The department has a risk register whereby potential risk is categorised and prioritised. From an AML perspective, the Life Insurance segment is most at risk of abuse, especially as to the source of the funds transferred by clients to pay their premiums, which tend to be higher than for other business lines. The role of the AML department is to verify the source of those payments and to ensure they do not originate from any illegal activity or from an individual or entity that is subject to local or international sanctions. We conduct quarterly audits on all clients, particularly in relation to the transactions within their life insurance portfolio, though other business segments are also subject to similar levels of scrutiny.

We systematically screen existing and new clients for evidence of previous fraudulent activity or business misconduct. The company has two main internal

control systems in place. The first is a real time check which is carried out prior to onboarding clients. Clients are vetted to ensure their names are not on any of the sanctions lists posted by authorities in the US, the EU, the UK, and through the UN consolidated list.

The second screening is done daily through an automated process. At the end of each working day, all active clients are screened for money laundering or other related misconduct, and the AML officer is immediately notified in the event of any breach or suspicious activity so that further checks can be carried out.

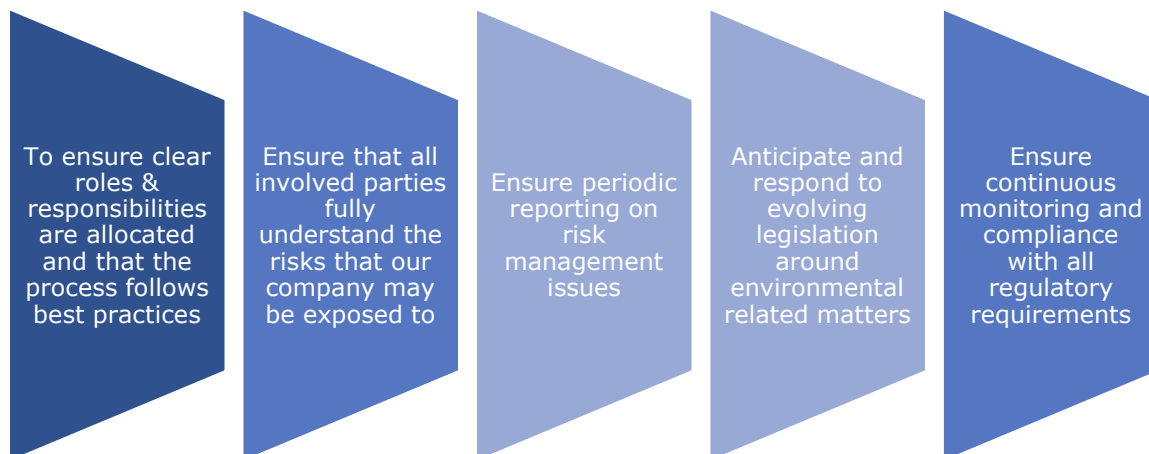

These checks are in addition to the Politically Exposed Persons (PEP) screening that is done regularly. This requires different procedures involving even more enhanced screening and due diligence.

In 2021 Alliance introduced a new AML policy called the "Customer Acceptance Policy" which details the customers' source of income, nature of the business conducted, financial stability, etc.

RISK MANAGEMENT FUNCTION

Alliance has implemented a robust Enterprise Risk Management framework as an integral part of our corporate structure. This enables us to avoid some risks and minimise others.

Our risk management framework's objective includes:

Our employees are the first line of defence when it comes to managing risk. They are responsible for enforcing the risk management framework, as they are the ones on the front line and are trained to detect and assess risks and react accordingly.

The second line of defence is through our risk management and compliance departments, who are charged with rigorously monitoring and controlling risks.

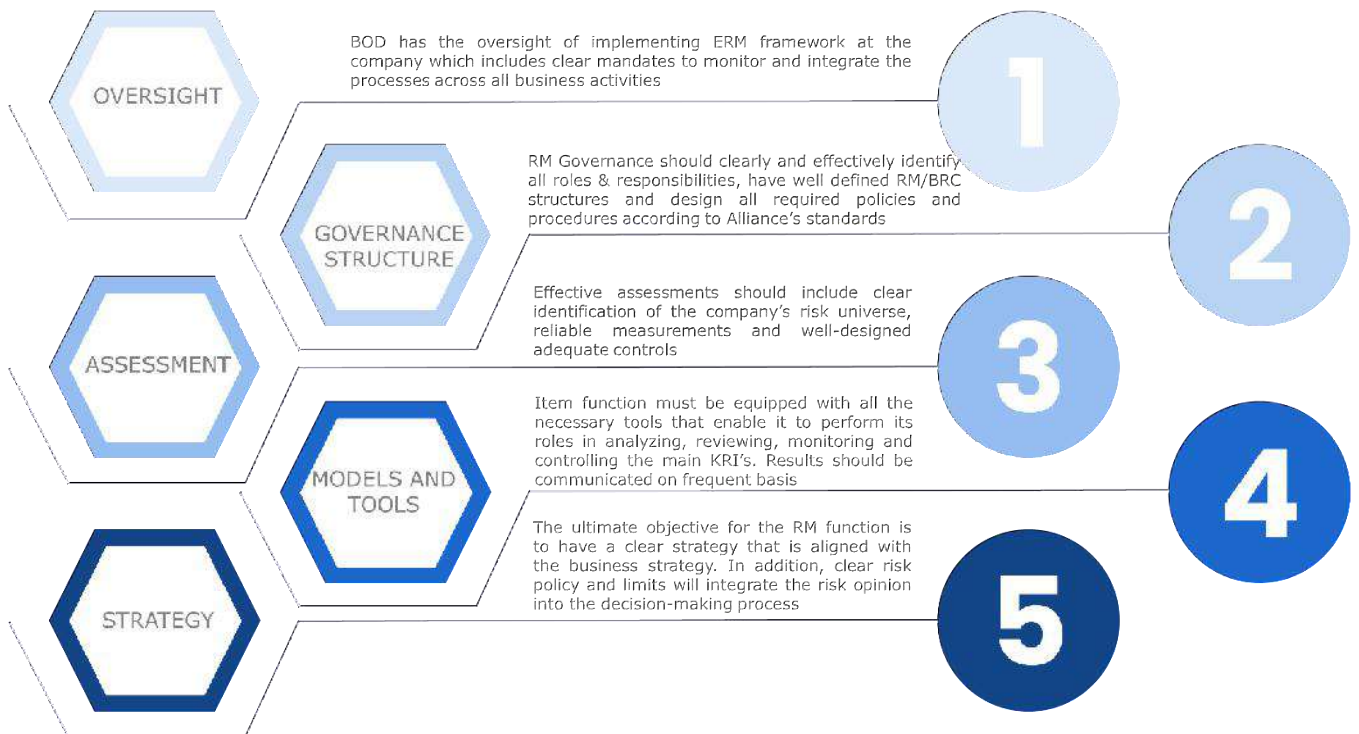

The third line is through the internal audit team.

Finally, the ultimate responsibility for managing risk lies with our Board of Directors through the Audit Committee.

Our risks fall within one of four main categories:

OUR ERM FRAMEWORK:
